To: Rep. Joan Wade ATT: Tanya Hein

From: Kathryn A. Kuhn, Director

Office: .

. Government Affairs

FAX #: 608-282-3642

MESSAGE:

Dear Tanya:

Per our conversation regarding AB 156, attached please find the written comments from Dr. Carl Becker, Chairman of the Department of Pathology for the Medical College of Wisconsin.

Dr. Becker's comments are technical in nature but may assist in ensuring that the intent of the bill is attained.

I hope this information is helpful, please let me know if you have any questions.

Kathryn Kuhn

Rationale:

- 1. The bill extends the current State Statutes concerning significant exposures. By drawing a blood sample on all accident fatalities and keeping it for 72 hours an individual who experiences a significant exposure will have the assurance that a sample is available for HIV testing.
- 2. The major burden for compliance with these proposed Statutes is on Medical Examiners and Coroners who will be expected to withdraw, store, obtain certification of an exposure, order testing and/or dispose of the cadaveric specimen.
- 3. The bill needs to be amended to include: Line 16, page 6:

The coroner or medical examiner shall preserve the blood specimen for 72 hours immediately following the time the blood was withdrawn, under conditions that have been determined to maintain the integrity of the specimen for laboratory testing,

The bill addresses the exposed person's right to know the HIV status of the source. None of the tests currently available for HIV testing are approved for cadaveric blood. Results obtained on hemolyzed specimens may be suspect according to the instructions included with the reagent kits. Therefore, if the goal of the bill is to be met, the storage of the specimen is critical.

Prophylactic treatment of the exposed person for HIV should not be postponed until the HIV status of the source is established. The CDC stresses that prophylactic therapy for HIV should ideally be started within 1-2 hours of exposure for it to be effective. After 24 hours and beyond, prophylactic therapy for HIV is rarely effective in preventing infection. The decision to offer prophylactic therapy should be made taking into account the degree of exposure and risk factors associated with the source (transfusion between 1978-1985 or administration of blood or clotting factors, i.v. drug use, lifestyle, history of STD's, infant of HIV infected mother, multiple sexual partners) and be independent of the test results. Prophylactic therapy can always be discontinued if/when the source is proven HIV negative.

2001 ASSEMBLY BILL 156

50507 in 5/14/01

March 1, 2001 – Introduced by Representatives Wade, Hundertmark, Kesterl, Musser, M. Lehman, Gronemus, Miller, Olsen, Freese, Albers, Gunderson, Shilling and Sykora, cosponsored by Senators Welch and Roessler. Referred to Committee on Public Health.

AN ACT to renumber and amend 252.15 (5m) (intro.), 252.15 (5m) (a), 252.15 (5m) (b) and 252.15 (5m) (c); to amend 252.15 (2) (a) 7. a., 252.15 (2) (a) 7. ai. and 252.15 (8) (a); and to create 252.15 (5m) (bg) and 252.15 (8) (c) of the statutes; relating to: permitting certain individuals to subject another individual's blood to a test for the human immunodeficiency virus, requiring the withdrawal and preservation of a blood specimen from certain corpses, permitting certain persons to subject a corpse or blood specimen withdrawn from a corpse to a test for the presence of the human immunodeficiency virus or other blood—borne pathogens, the recovery of costs of certain tests for the presence of the human immunodeficiency virus, the requiring a funeral director to obtain a release before embalming certain corpses.

Analysis by the Legislative Reference Bureau

Current law generally prohibits testing of an individual for the human immunodeficiency virus (HIV) unless the individual provides his or her informed consent. Current law does, however, provide several exceptions to this prohibition. One exception permits certain persons, such as health care providers, law

enforcement officers, and fire fighters, to submit the individual's blood to a test for HIV without receiving the individual's consent if certain requirements are met. These requirements include all of the following:

1. The person seeking the test has been significantly exposed to the individual. A person is "significantly exposed" if the person is exposed to the individual in a

manaer that carries a potential for transmission of IIIV.

A physician certifies in writing that the exposed person was significantly exposed.

3. The exposed person submits to an HIV test.

4. The individual whose blood will be tested is given the opportunity to consent to the test for HIV and is informed that his or her blood may be tested for HIV and that the results of the test may not be disclosed without his or her consent to anyone other than the exposed person.

5. The test is performed on a sample of the individual's blood that is drawn for a purpose other than testing for HIV or, if a blood sample is not available, the test is performed on a sample of the individual's blood that is obtained as a result of a

court order.

6. The exposed person used universal precautions at the time of the exposure to the individual unless the time that it would have taken the person to use universal precautions would have endangered the life of the individual. precautions" are measures taken by a person, in accordance with federal guidelines,

to prevent the transmission of NIV.

This bill expands the exception to the prohibition against testing an individual for HIV without his or her consent to permit a person who provides emergency care to the victim of an emergency of accident, who is exempt from civil liability under Wisconsin's Good Samaritan law for his or her acts or omissions in providing the emergency care and who, during the course of providing the emergency care, is significantly exposed to the victim to subject the victim's blood to a test for HIV without the victim's consent. To be eligible for the exception, a Good Samaritan must meet all of the current law requirements for the exception except for the requirement that universal precautions be used when providing emergency care to the individual.

Current law also permits a person who provides emergency care to the victim of an emergency of accident, including a Good Samaritan, a funeral director, a medical examiner, a coroner, a person who prepares a corpse for burial or autopsy or who performs or assists in performing an autopsy on a corpse, a health care provider, or an agency of employee of a health care provider to subject a corpse to a test for the presence of HIV and to receive the test results if all of the following requirements are met:

1. The person seeking the test has been significantly exposed to a corpse or to an individual who dies prior to testing for HIV.

A physician certifies in writing that the person seeking the test was

significantly exposed.

3. The physician's written certification accompanies the request for testing and disclosure.

Current law also requires that a coroner or medical examiner receive potice of certain deaths, including a death that follows an accident, regardless of whether the accident is the primary cause of death.

This bill requires a coroner, medical examiner, physician designated by the coroner or medical examiner, or person designated by the physician to withdraw a blood specimen of ten cubic centimeters from the corpse of an individual whose death must be reported to a coroner or medical examiner because the death followed an accident. The coroner or medical examiner must preserve the blood specimen for 72 hours or until the coroner or medical examiner receives notification that a HIV test has been ordered for the specimen, whichever is earlier. Upon receipt of notification, the specimen must be forwarded to a laboratory designated to test the specimen. If the coroner does not receive notification within 72 hours, the coroner or medical examiner must dispose of the specimen.

The bill also permits a person currently authorized to subject a corpse to a test for the presence of HIV to subject a blood specimen that is authorized under the bill to be withdrawn to a test for the presence of HIV if the current law requirements for subjecting a corpse to a HIV test are met.

Under the bill, a funeral director is required to obtain a release from the coroner or medical examiner prior to embalming a corpse from which a blood specimen must be withdrawn.

Finally, under the bill, if a person violates any of the requirements for testing a corpse or a blood specimen, or for withdrawing a blood specimen, and the violation prevents a HIV test from being performed on the corpse or blood specimen or prevents a reliable test result from being obtained, the individual for whom the HIV test was ordered may recover any reasonable costs incurred in testing the individual for HIV.

For further information see the **state and local** fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

SECTION 1. 252.15 (2) (a) 7. a. of the statutes is amended to read.

252.15 (2) (a) 7. a. If all of the conditions under subd. 7. ai. to c. are met, an emergency medical technician, first responder, fire fighter, peace officer, correctional officer, person who is employed at a secured correctional facility, as defined in s. 938.02 (15m), a secured child caring institution, as defined in s. 938.02 (15g), or a secured group home, as defined in s. 938.02 (15p), state patrol officer, jailer or keeper of a jail or person designated with custodial authority by the jailer or keeper who,

during the course of providing care or services to an individual; or a peace officer, correctional officer, state patrol officer, jailer or keeper of a jail or person designated with custodial authority by the jailer or keeper who, while searching or arresting an individual or while controlling or transferring an individual in custody; or a health care provider or an employee of a health care provider who, during the course of providing care or treatment to an individual or handling or processing specimens of body fluids or tissues of an individual; or a staff member of a state crime laboratory who, during the course of handling or processing specimens of body fluids or tissues of an individual; or a person who is exempt from civil liability under s. 895.48 for his or her acts or omissions in providing emergency care to an individual during an emergency or accident and who, during the course of providing the emergency care; is significantly exposed to the individual may subject the individual's blood to a test or a series of tests for the presence of HIV, antigen or nonantigenic products of HIV or an antibody to HIV and may receive disclosure of the results.

SECTION 2. 252.15 (2) (a) 7. ai. of the statutes is amended to read:

252.15 (2) (a) 7. ai. The affected person uses universal precautions, if any, against significant exposure, and was using universal precautions at the time that he or she was significantly exposed, except in those emergency circumstances in which the time necessary for use of the universal precautions would endanger the life of the individual and in those circumstances in which the emergency caregiver is a person exempted from civil liability under the conditions specified under s. 895.48.

SECTION 3. 252.15 (5m) (intro.) of the statutes is renumbered 252.15 (5m) (am) (intro.) and amended to read:

252.15 (5m) (am) (intro.) Notwithstanding s. 157.05, a corpse may, or a blood specimen that is withdrawn under par. (bg), shall be subjected to a test for the presence of HIV, antigen or nonantigenic products of HIV er, an antibody to HIV, or other blood—borne pathogen and the test results disclosed to the person individual who has been significantly exposed under any of the following conditions:

SECTION 4. 252.15 (5m) (a) of the statutes is renumbered 252.15 (5m) (am) 1. and amended to read:

252.15 (5m) (am) 1. If a person an individual, including a person an individual exempted from civil liability under the conditions specified under s. 895.48, who renders to the victim of an emergency or accident emergency care during the course of which the emergency caregiver is significantly exposed to the emergency or accident victim and the emergency or accident victim subsequently dies prior to testing for the presence of HIV, antigen or nonantigenic products of HIV ex, an antibody to HIV, or other blood-borne pathogen, and if a physician, based on information provided to the physician, determines and certifies in writing that the emergency caregiver has been significantly exposed and if the certification accompanies the request for testing and disclosure. Testing of a corpse under this paragraph shall be ordered by the The coroner, medical examiner or physician who certifies the victim's cause of death under s. 69.18 (2) (b), (c) or (d) shall order the testing of the corpse or the blood specimen that is withdrawn under par. (bg).

SECTION 5. 252.15 (5m) (b) of the statutes is renumbered 252.15 (5m) (am) 2. and amended to read:

252.15 (5m) (am) 2. If a funeral director, coroner, medical examiner or appointed assistant to a coroner or medical examiner who prepares the corpse of a decedent for burial or other disposition or a person an individual who performs an

 $\mathbf{2}$

autopsy or assists in performing an autopsy is significantly exposed to the corpse, and if a physician, based on information provided to the physician, determines and certifies in writing that the funeral director, coroner, medical examiner or appointed assistant has been significantly exposed and if the certification accompanies the request for testing and disclosure. Testing of a corpse under this paragraph shall be ordered by the The attending physician of the funeral director, coroner, medical examiner or appointed assistant who is so exposed shall order the testing of the corpse or the blood specimen that is withdrawn under par. (bg).

SECTION 6. 252.15 (5m) (bg) of the statutes is created to read:

252.15 (5m) (bg) 1. Notwithstanding s. 157.05, in cases involving a death that must be reported under s. 979.01 (1g) the coroner or medical examiner of the county where the death occurred shall withdraw a blood specimen of 10 cubic centimeters from the body of the decedent or shall require a physician designated by the coroner or medical examiner or a qualified person at the direction of the physician to withdraw a blood specimen of 10 cubic centimeters from the body of the decedent. The coroner or medical examiner shall preserve the blood specimen for the physician immediately following the time the blood specimen was withdrawn or until the coroner or medical examiner receives notification under subd. 2., whichever is earlier. Upon receipt of notification under subd. 2., the coroner shall forward the blood specimen to a laboratory designated to conduct the test. If the coroner does not receive notification under subd. 2. within the phours immediately following the time the blood specimen was withdrawn, the coroner shall dispose of the specimen.

2. A person under par. (am) who orders the testing of a blood specimen that is withdrawn under this paragraph shall notify the coroner or medical examiner who is preserving the specimen that a test for presence of HIV, antigen or nonantigenic

The coroner or medical examiner shall preserve the blood under conditions that maintain the integrity of the specimen for laboratory testing as specified by the department.

 $\mathbf{2}$

products of HIV,	an	antibody	to	HIV,	or	other	${\bf blood-borne}$	pathogen	has	been
ordered.		٠	,	•						

3. A funeral director shall obtain a release from the coroner or medical examiner of the county where the accident occurred, as provided in s. 979.01 (4), prior to proceeding with embalming a corpse that is subject to this paragraph.

SECTION 7. 252.15 (5m) (c) of the statutes is renumbered 252.15 (5m) (am) 3. and amended to read:

252.15 (5m) (am) 3. If a health care provider or an agent or employee of a health care provider is significantly exposed to the corpse or to a patient who dies subsequent to the exposure and prior to testing for the presence of HIV, antigen or nonantigenic products of HIV or, an antibody to HIV, or other blood-borne pathogen, and if a physician who is not the health care provider, based on information provided to the physician, determines and certifies in writing that the health care provider, agent or employee has been significantly exposed and if the certification accompanies the request for testing and disclosure. Testing of a corpse under this paragraph shall be ordered by the The physician who certifies that the significant exposure has occurred shall order the testing of the corpse or the blood specimen that is withdrawn under par. (bg).

SECTION 8. 252.15 (8) (a) of the statutes, as affected by 1999 Wisconsin Act 79, is amended to read:

252.15 (8) (a) Any person violating sub. (2), (5) (a), (5m) (am), (6) or (7) (c) is liable to the subject of the test for actual damages, costs and reasonable actual attorney fees, plus exemplary damages of up to \$1,000 for a negligent violation and up to \$25,000 for an intentional violation.

SECTION 9. 252.15 (8) (c) of the statutes is created to read:

252.15 (8) (c) If a person's violation of any of the requirements of sub. (5m)
prevents a test ordered under sub. (5m) from being performed or a reliable test result
prevents a test ordered under sub. (5m) from being performed or a reliable test result from being obtained, the individual for whom the test was ordered may recover any
reasonable costs incurred by the individual in testing the individual's blood for the
presence of HIV, antigen or nonantigenic products of HIV, an antibody to HIV, or
other blood-borne pathogen.
