Subject					
Sales tax exemption for textbooks					

Assumptions Used in Arriving at Fiscal Estimate

The bill creates a sales and use tax exemption for textbooks that are required for a university, college or technical college course.

According to the American Association of Publishers, 2000 net sales for books for higher education were \$3.23 billion. According to the U.S. Department of Education, National Center for Education Statistics, 15.1 million students are estimated to be enrolled in 2-year and 4-year degree college programs in 2000 and 58.2% of all students enrolled in these programs in 1997 were full-time students. Thus, it is estimated that there were 8.8 million (15.1 million x 58.2%) full-time students enrolled in colleges, universities and vocational schools in 2000. It is estimated that \$368 is spent on college textbooks per enrolled full-time student nationally (\$3.23 billion/8.8 million students).

Based on data from the University of Wisconsin System, the Wisconsin Association of Independent Colleges and Universities and the Wisconsin Technical College System, it is estimated that 221,000 full-time equivalent (FTE) students are enrolled in Wisconsin universities, colleges and technical colleges in a 2-year or 4-year program and 6,400 FTE students are enrolled in non-degree technical college courses. Thus, it is estimated that \$83.7 million ($\$368 \times 227,400$ FTE Wisconsin students) is spent annually on college textbooks in the state. Exempting these sales would result in a \$4.2 million ($\$83.7 \text{ million} \times 5\%$) decrease in sales and use tax revenue.

For FY01, county and stadium sales tax revenues are expected to be 7.064% of state sales tax. Thus, the revenue loss to local governments would be approximately \$295,000 ($\$4.2 \text{ million} \times 7.064\%$).

Long-Range Fiscal Implications
