Fee for reserved	l deer hunting bacl	k tags			

Assumptions Used in Arriving at Fiscal Estimate

Bill Summary: Under current law, the Department reserves a deer hunting back tag number for a person who pays a reservation fee. Each year, upon payment of the fee, the Department issues the same back tag number to that person. For this service, the person must pay a reservation fee of \$4.50 together with an issuance fee of \$0.50. This bill provides that a person is required to pay only a one-time fee to reserve a back tag number. Once the fee is paid, the Department must issue the same back tag number to that person each year upon that person's request, at no charge. The bill does not change the amount of the fee that a person must pay for the initial reservation.

Fiscal Estimate: This bill would have two primary fiscal effects, one on costs and the other on revenues.

The Department would incur a one-time cost to modify its Automated License Issuance System (ALIS) to issue reserved back tag numbers at no charge. Since the bill does not specify an effective date, this change would most likely have to be made outside the normal system upgrade process that occurs in the late winter and would cost \$5,000 - \$8,000. If the change were made as part of the annual upgrade the cost would be approximately \$5,000.

In addition to the impact on operating costs, both the Department and its license agents would incur an ongoing revenue loss. Reserving 3,000 back tag numbers each year generates \$13,500 for the Fish and Wildlife Account of the Conservation Fund and \$1,500 for license agents. Under the bill, the only revenue would be generated by new reservations. After the first year or two, the number of new reserved back tags would decrease to somewhere between 250 and 500, generating only \$1,250 - \$2,500 per year (including the \$0.50 issuance fee. which would go to the Department). The anticipated revenue loss to the Department would therefore be \$11,000 - 12,250 per year, estimated at \$12,000 for purposes of this fiscal estimate.

Department workload to manage reserved back tag numbers would change under this bill but would balance out in a year or two. It would take more time to handle payments for reserved numbers, but there would fewer new reservations than the quantity currently reserved annually.

Long-Range Fiscal Implications

Annual reduction of \$12,000 in revenue to the Fish & Wildlife Account of the Conservation Fund.
