Analysis by the Legislative Reference Bureau

Under current law, no person may drill to explore for or produce oil or gas from beneath the beds of the Great Lakes or bays or harbors that are adjacent to the Great Lakes unless that drilling originates from the shore and the person has a written lease from the department of natural resources.

This bill prohibits any person from drilling beneath the beds of the Great Lakes or bays or harbors that are adjacent to the Great Lakes to explore for or produce oil or gas, without regard to where the drilling originates. This bill also prohibits any person from installing an oil or gas pipeline on or beneath the beds of the Great Lakes.
