Analysis by the Legislative Reference Bureau

CREATION AND DISSOLUTION OF A DISTRICT

This bill authorizes certain contiguous municipalities (any city other than a 1st class city, any village, or any town with a population greater than 2,500) to jointly

create a local park and recreation district (district). A district is a local unit of government that is a body corporate and politic and that is separate and distinct from, and independent of, the state and the municipalities within its jurisdiction.

Subject to a number of conditions, a district may be created by one of two methods. Under the first method, the governing bodies of two or more contiguous municipalities adopt an enabling resolution that declares the need for establishing the district and contains a detailed description of the boundaries of the proposed district. Each municipality that adopts a substantially similar enabling resolution within 90 days, beginning with the date of adoption of the first enabling resolution, may be part of the initial jurisdiction of a district. Under the second method, a district consisting of two or more contiguous municipalities may be created by a petition and referendum. The petition must be circulated after December 31 and must be filed no later than the 3rd Tuesday in February in each municipality within the proposed boundaries of the district. If it is signed by a number of qualified electors residing in the municipality equal to at least 15% of the votes cast for governor in the municipality at the last gubernatorial election, a referendum is held at the next succeeding spring election. A district is then created with a jurisdiction that consists of each of the municipalities in which the referendum is approved, except that no district may be created unless the referendum is approved in at least two contiguous municipalities. *question*

Before a district may be created, the governing bodies of each of the involved municipalities must reach an agreement that includes a number of components, including a method to provide a loan for initial operating funds for the district, ~~a method to apportion the members of the district's board among the participating municipalities (unless the members are elected),~~ and a method to transfer title of the municipalities' park facilities to the district. Before such an agreement may be entered into, the participating municipalities must select an arbitrator who will decide by November 1 any of the issues that are not resolved by the municipalities by September 1. Also before a district may be created, a municipality must negotiate with a county the termination of any applicable agreement or contract under which a county exercises municipal park powers within the municipality. If a municipality is unable to negotiate the termination of any such agreements or contracts, the municipality may not become part of a district until the agreements or contracts expire or are otherwise terminated. Under the bill, no new agreements or contracts authorizing a county to exercise municipal park powers within a municipality may be entered into unless the agreements or contracts contain provisions under which the municipality may terminate the agreement or contracts so that it may create or participate in a district.

In connection with park facilities, the powers of a district board include: the authority to acquire, develop, maintain, improve, operate, and manage the park facilities; the authority to operate recreational facilities or programs; the authority to enter into contracts; the authority to employ personnel; and the authority to impose a sales tax and a use tax, and levy a property tax, to carry out its functions. Before the taxes imposed by a district may take effect, however, the district's action must be approved in a referendum.

selected members of a

A district is governed by a nine-member board of directors ^{that is} elected at-large at the spring election ~~or appointed by the chief executive officer of each participating municipality, according to a formula that is agreed to by the parties or imposed by an arbitrator.~~ The terms of directors are three years, although the initial terms are staggered such that each one-third of the seats on the board are for terms of approximately one, two, and three years. The district board may change any decision that was made by an arbitrator, ~~and~~ may adopt procedures to expand the jurisdiction of the district to include other municipalities ~~and~~ the governing bodies of which approve of their inclusion in the district. ~~A district board~~

A district may dissolve by action of the district board, subject to payment of the district's debts and fulfillment of its other contractual obligations. If a district is dissolved, its property must be transferred to the municipalities within the district's jurisdiction. The district board determines how, and to which municipality, the property is transferred based on factors including the current value of the park facilities initially transferred by a municipality to a district and the amount of money, sales tax revenue, and other contributions made by, or collected from, a municipality.

Under the bill, a municipality within the district's jurisdiction may make loans or lease or transfer property to a district. Generally, however, a municipality may not create a park or expend any funds to support park or recreational facilities after a district imposes taxes.

TAXATION

Under the bill, a district may adopt a resolution to impose a sales tax and a use tax at a rate of 0.1% on the sale or use of tangible personal property and services in the district, subject to approval by the electors of a district at a referendum. The district must hold the referendum at the first ~~spring or September primary~~ ^{held} that is at least 45 days after the date on which the district adopts the resolution to impose the taxes. The district may use the tax revenue only for purposes related to park facilities. A retailer in the district may not collect the tax imposed by the district after the district dissolves.

Under the bill, the district may also levy a property tax on the property located in the district. However, the district must lower the property tax levy by the amount of any sales tax and use tax imposed by the district that was collected in the previous year.

Under the bill, a district's income is exempt from the income tax, a district's property is exempt from the property tax, property transferred to a district is exempt from the real estate transfer fee, and sales of tangible personal property or services to the district are exempt from all state and local sales taxes and use taxes.

This bill will be referred to the joint survey committee on tax exemptions for a detailed analysis, which will be printed as an appendix to this bill.

Points of Clarification:

- 1) Could we have a Drafter's note from the LRB stating that WI SS. 111.70 (Municipal Employment Relations Act) applies to the park districts created as a result of our bill
- 2) Explicitly exclude municipalities in Milwaukee County from forming a park district. They are already involved in a countywide system that functions well.
- 3) Could we also have a Drafter's note that specifies that employees in formed park districts are part of the WRS and are allowed to join the county's/state's health benefits program, under the authority of the Employee Trust Fund.
