New amendment to AB 698, per our conversation:

Incorporate all of LRBa 1293/2 and add to it a provision stating that the patient receiving the prescription should receive at the time the prescription is given, information concerning sexually transmitted diseases and their treatment and allergy risks, as well as a public health system phone number to call if there are any questions about this information. This is based on the following request from Dr. Davis of DHFS (please try your best to capture the intent; not sure if I missed anything).

*It is critical to ensure that the contact is aware of the risks and benefits of the treatment:*

*\* That the contact is aware that the prescribed medication may not cure all sexually transmitted infections that the contact may have*

*\* That the contact is aware that re-infection is probable unless all of the contact's sexual contacts are also treated*

*\* That the public health system provides assistance in identifying, locating and arranging treatment for those contacts*

*\* That the contact has information about a possible allergic reaction*

*The prescribing health care provider cannot accomplish these without at least mandatory provision of information to the patient. The current lack of a mandate because of concern that a physician might not be able to easily locate these materials is now a shortcoming of this bill. As had been included in an earlier version of the bill we suggest mandating the provision of these materials (use "must" rather than "may").*

Again, I'm sorry for the short notice. Please try to get this done no later than lunch, or I fear that Rep. Underheim will not accept the change. Thanks!

*Per Rep. Wasserman:*

*- Require physician, etc., to provide info*

*- info consists of*

- (1) info about allergies*
- (2) STDs & treatment*
- (3) contact for further questions:*
  - physician*
  - local health*
