1 **relating to:** professional land surveyors and the practice of professional land

surveying and granting rule-making authority.

Analysis by the Legislative Reference Bureau

Under current law, with certain exceptions, a person may not practice land surveying or represent that he or she is a land surveyor unless the land surveyor section (section) of the examining board of architects, landscape architects, professional engineers, designers and land surveyors (board) has issued a certificate of registration or permit to the person. "Land surveying" is defined as determining the location of land boundaries and boundary corners; preparing maps that show the shape and area of tracts of land or subdivisions or the layout of roads, streets, or rights–of–way; or preparing official plats or maps of land in this state.

This bill replaces "land surveying" with the term "practice of professional land surveying" and defines the term as any of the following:

1. Establishing, restoring, or perpetuating private or public land boundaries and boundary corners.

2. Preparing maps for establishing the boundaries of interests in real property that depict any of the following: a) the shape and area of tracts of land or the subdivision or consolidation of tracts; b) the layout and rights–of–way of roads or streets; c) air, water, or property rights; or d) public or private easements.

3. Preparing assessors' or official plats or maps of lands in this state.

4. Measuring and analyzing a tract of land to determine its legal description.

5. Designing or coordinating designs for platting or subdividing tracts of land.

6. Applying knowledge or experience about land surveying to assist in the development, use, or management of geographic or land information systems.

7. Performing cartographic, construction, or geodetic surveying in connection with any of the practices described in the above items.

8. Providing consultation services related to any of the practices described in the above items.

The bill also replaces the certificate of registration requirement under current law with a licensure requirement. Therefore, under the bill with certain exceptions, a person may not engage in the practice of professional land surveying or represent that he or she is a professional land surveyor unless the person is issued a license or permit by the section. Also, after July 1, 2010, the bill requires employees of the federal government, this state, and public utilities to obtain a license or permit to engage in the practice of professional land surveying. Such employees are exempt from the certificate of registration and permit requirements under current law.

In addition, the bill changes the name of the section to the professional land surveyor section and changes the name of the board to the examining board of architects, landscape architects, professional engineers, designers and professional land surveyors. Finally, the bill replaces various references under current law to "registered land surveyor" with "licensed professional land surveyor."

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
