Subject: TEACH Statutory Language Requests

Please draft the following statutory language changes for TEACH:

1. **Student Technology Support Initiative** - Initiative would train K-12 students to provide educational technology support services to their school districts. (See attached description) (Drafter's note: I would like this initiative to be for the 01-03 biennium only.)
2. **Alternative Technology Pilot Program** - Direct TEACH to study the use of alternative technologies such as wireless communications to provide K-12 instruction. (See attached description) (Drafter's note: The pilot should sunset after the FY02.)

Governor Thompson's Task Force on Technical Education predict an ongoing acute shortage of highly skilled technical workers in Wisconsin and across the nation.

To address these issues, the UW-System instituted student technology services programs at all of its campuses. Under the program, students are trained to deliver IT services to students, faculty, and staff. Dual benefits result: technology support demands are met at the institutional level and a pool of trained, skilled technical workers is being developed for the IT workforce.

Instructions: Make necessary changes to Chapter 44

Request: Study the use of emerging technology products, services, and applications for distance learning for the K-12 environment. TEACH anticipates conducting approximately six pilots at an estimated total cost of \$500,000 with 50% funding from federal E-rate dollars and the remaining 50% from the TEACH Telecommunications Access Program.

Rationale: Many assumptions exist today about emerging technologies. And although these assumptions are untested, they often have a significant impact on policy or purchasing decisions. For example, some believe interactive IP video is economically deployable on a large-scale basis today with high quality applications for K-12 education. Much more reliable information is needed regarding the future direction and applications of educational technology. The results of the pilot will be documented and used for statewide strategic educational technology planning.

Instructions: Draft non-statutory language.

7. Assistive Technology

Request: Identify assistive technology needs of K-12 students including (but not limited to) access to and availability of assistive technology hardware and software and related staff development needs of educators. Report findings and recommendations to the Governor by January, 2002.

Rationale: Assistive technology is any item, piece of equipment, or product system that is used to increase, maintain, or improve the functional capabilities of a child with a disability. Assistive technology can improve the learning capabilities and promote educational gains of students with disabilities through mobility enhancements, accessibility to information, and cognitive function. Currently, TEACH staff does not have the expertise to determine ways in which current TEACH resources could be used effectively to address the needs of students with disabilities and identify what additional resources consistent with the TEACH mission are needed to assist these students. A study group comprised of K-12 and post-secondary special education specialists, representatives from professional organizations (i.e., Wisconsin Assistive Technology Initiative), and others could assist TEACH staff in this effort.

Instructions: Draft necessary non-statutory language.

8. Mobile Technology Centers

Request: Direct the TEACH Board to research the feasibility of "Mobile Technology Centers" to determine: (a) Wisconsin communities lacking public access points (i.e., schools, libraries, community centers) to the Internet and other technology resources; (b) best method(s) of delivering the Internet and other technology resources to these communities; and (c) identification of private funding sources for Mobile Technology Centers. Report findings and recommendations to the Governor by January, 2002.

Rationale: The "digital divide," or the disparities in public access to the Internet and other technology resources, is a well-documented problem. Nationwide, 20% of households that earn less than \$30,000 a year use computers at home, compared to 80% of households which earn \$75,000 or more. Although public access to the Internet in Wisconsin has grown dramatically with 98% of our public libraries and the majority of Wisconsin school districts linked to the Internet, gaps still persist, especially for small communities located in isolated areas of the state. Anecdotal evidence from the 1999 TEACH Training and Technical Assistance Grants projects, especially those with a library patron training focus, have experienced much greater than expected demand for services. This is an indication of the public's desire for Internet access and other technology resources.

Instructions: Draft necessary non-statutory language.
