Motion:

Move to require DHFS to allocate \$299,000 GPR and \$793,500 FED in 2001-02 and \$527,400 GPR and \$140,200 FED in 2002-03 from the MA administration appropriations for development and support of the Wisconsin immunization registry. Expand the purposes for which expenditures can be made from this appropriation to include the development and support of the registry.

Note:

The Wisconsin immunization registry (WIR) is an automated, web-based system to centralize recording keeping of immunization records for all Wisconsin children. The web-based system was first piloted in October, 1999. Currently, 140 providers participate, including the 72 local public health departments. Providers may have multiple clinics where the WIR is used. Approximately 1.4 million patients are in the system as of May, 2001. DHFS is working to implement the system statewide to include the 1,000 private health care provider sites that provide pediatric immunizations.

In the past, DHFS has used one-time federal immunization funds to fund WIR. There are no base funds that support the program. The federal Health Care Financing Administration (HCFA) has recently approved the use of MA funding for the cost of developing immunization registries with 90% federal matching funds. Additionally, federal MA funds would be available to support the ongoing costs of the registry for the portion of the registry that is represented by MA-eligible children.

The MA administration appropriations fund contracts for administration of MA, including the state's contract with the MA fiscal agent, currently Electronic Data Systems, Inc.. The fiscal agent currently performs a variety of functions, including claims processing, provider certification, point-of-sale operations for pharmacy benefits, prior authorization, dental claims processing, eligibility functions, collection of pharmaceutical manufacturer rebates and coordination of benefit

functions. In addition, the appropriations fund a variety of other MA-related functions, including decision support functions, health maintenance organization (HMO) enrollment, outreach for Healthy Start, consultants that monitor performance of hospitals and nursing homes. These appropriations do not fund DHFS staff that administer the MA program.

This motion would require DHFS to allocate \$299,000 GPR and \$793,500 FED in 2001-02 and \$527,400 GPR and \$140,200 FED from the MA administration appropriations to fund both the development of the registry and ongoing support costs of the registry, but does not provide funding for this function. Consequently, DHFS would be required to give priority to funding the costs of developing and maintaining the WIR over all other functions supported by these appropriations.

Finally, the motion would modify the current MA administration appropriations to authorize DHFS to expend funds from these appropriations for this purpose. Currently, these appropriations fund costs relating to the MA program, exclusively.
