5   redistricting.

Analysis by the Legislative Reference Bureau

This bill redistricts, according to the number of inhabitants, the congressional districts of this state based on the results of the 2000 federal decennial census of population. In accordance with that census, the bill decreases the number of congressional districts from nine to eight. Under the bill, county and municipal boundaries and wards used to create congressional districts are the boundaries and wards in effect on August 1 of the year following the year of the federal decennial census (in this case, August 1, 2001). The boundaries do not account for any municipal annexation, detachment, or consolidation after that date.

Current law requires congressional districts to be as uniform in population as is practicable. The table below illustrates, for the congressional districts proposed, the numeric amount and the percentage by which the districts with the smallest and largest populations deviate from the ideal population for a congressional district. The population figures contained in the table are derived from the results of the federal decennial census.

	District	Population	Deviation	Pct. Dev.
Smallest:	Cong. District 1	670,457	–2	0.00
Largest:	Cong. Districts 6 and 8	670,462	3	0.00

This bill also requires the legislative reference bureau, in enrolling any redistricting plan that has passed both houses of the legislature, to attach an updated appendix that includes all of the following: the population statistics for the congressional districts created under the bill; a statewide map of the congressional districts created under the bill; a map of the congressional districts created under the bill that are in Milwaukee County; and, with certain exceptions, a detail map illustrating the division of any city, village, or town among two or more congressional districts.

For further information, see the appendix printed at the end of this bill. The appendix was prepared by the legislative reference bureau and contains the following information: population statistics for the eight congressional districts, a statewide map of congressional districts, and a map of each congressional district. The population data contained in the appendix is derived from the federal decennial census.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

1   SECTION 1. Subchapter I (title) of chapter 3 [precedes 3.001] of the statutes is

2   created to read:

3   **CHAPTER 3**

4   SUBCHAPTER I

5   GENERAL PROVISIONS

6   SECTION 2. 3.001 of the statutes is amended to read:

Article I, section 2 of the U.S. Constitution requires congressional districts within the state to be strictly equal in population. The smaller the overall range of a plan, the more defensible the plan is under Article 1, section 2.

The overall range of this plan, 1.27%, is higher than the overall range of the bill it amends (.00%). It is also higher than the overall range of the congressional plans adopted after 1970 (.07%), 1980 (.09%), and 1990 (.00%)). In addition, the overall range of this plan is higher than the overall range of the New Jersey plan invalidated by the the U.S. Supreme Court in 1983. See *Karcher v. Daggett*, 462 U.S. 725 (1983) (invalidating plan with overall range of .6984%).

You may want to consider reducing the overall range of this plan.
