Dear members of the Joint Finance Committee:

We, the under-signed parents, encourage you to support the proposal before you to raise the entry-level income for parents seeking to participate in the choice program. We also encourage you to endorse and support the efforts to ensure that parents using the MPCP aren't dropped from the program for minor increases in income.

Moving a child from one school to another greatly reduces the chances of success for that child. Forcing parents to choose between the best school for younger children and college for a high school graduate is cruel and not good policy. Some families have had a child move on to college and the younger children have had to leave the program due to current income guidelines.

Also, some parents have received a promotion or slight salary increase and then no longer qualify for the choice program. Such situations result in a net loss of income for parents who are working hard to improve their conditions.

Situations such as these are unjust and can be partially remedied by passing the proposal before you. You can be the hero or many children and parents by remedying this today.

Thank you for taking the time to read our petition. We are hopeful as we await the outcome of this hearing and final votes.

April 4, 2001

Dear members of the Joint Finance Committee:

I am very much in support of providing protection for parents with children in the Milwaukee Parental Choice Program. I would like you to pass the proposals for removing penalties related to increased income and to raise the lower limit for admission into the choice program from 175% of poverty to 185%.

Neither proposal will cost more in the long run because there is a cap on the number of participants who may take advantage of the MPCP. Both proposals make sense because they encourage parents to improve both their financial situation and the education of their children. Both proposals encourage parents to move up the economic ladder by ensuring that they will be able to choose the best school for their children and the job that pays the best.

Thank you very much for considering my opinion. I will be eagerly watching the outcome of this debate.

Sincerely,

*Susette Hubbard*

April 4, 2001

Dear members of the Joint Finance Committee:

I am very much in support of providing protection for parents with children in the Milwaukee Parental Choice Program. I would like you to pass the proposals for removing penalties related to increased income and to raise the lower limit for admission into the choice program from 175% of poverty to 185%.

Neither proposal will cost more in the long run because there is a cap on the number of participants who may take advantage of the MPCP. Both proposals make sense because they encourage parents to improve both their financial situation and the education of their children. Both proposals encourage parents to move up the economic ladder by ensuring that they will be able to choose the best school for their children and the job that pays the best.

Thank you very much for considering my opinion. I will be eagerly watching the outcome of this debate.

Sincerely,

Sharon Slaughter/Bishop

I'm proud to say that my child is certainly in a good learning environment. St. Rose has dedicated committed teachers with outstanding teaching skills! Also St. Rose has small class sizes so that my child may have a close child-teacher relationship. St. Rose is working very hard to meet all state and national standards.

Can we please keep Choice Alive. The 1st 3 years of schooling for my son was in public schools, a different public school each year. The classes #'s were higher and I feel that my son's grades have improved greatly due to the small class of students. <sup>with more attention</sup> Without Choice my son would not be one of the top learning students in class, on the honor roll all 4 quarters, each year able to tutor other students. Choice is the best opportunity that has entered my life as a single parent and will do where diversity is celebrated

The Choice program has given me the opportunity to place my child in a school that has small classroom sizes and dedicated teachers. Parents should be given the opportunity to place their children in the schools of their choice. The Parental Choice program has allowed parents to place their children in quality schools despite the fact that their income level is at or close to the poverty level.

Dear members of the Joint Finance Committee:

We, the under-signed parents, encourage you to support the proposal before you to raise the entry-level income for parents seeking to participate in the choice program. We also encourage you to endorse and support the efforts to ensure that parents using the MPCP aren't dropped from the program for minor increases in income.

Moving a child from one school to another greatly reduces the chances of success for that child. Forcing parents to choose between the best school for younger children and college for a high school graduate is cruel and not good policy. Some families have had a child move on to college and the younger children have had to leave the program due to current income guidelines.

Also, some parents have received a promotion or slight salary increase and then no longer qualify for the choice program. Such situations result in a net loss of income for parents who are working hard to improve their conditions.

Situations such as these are unjust and can be partially remedied by passing the proposal before you. You can be the hero or many children and parents by remedying this today.

Thank you for taking the time to read our petition. We are hopeful as we await the outcome of this hearing and final votes.

Moving a child from one school to another greatly reduces the chances of success for that child. Forcing parents to choose between the best school for younger children and college for a high school graduate is cruel and not good policy. Some families have had a child move on to college and the younger children have had to leave the program due to current income guidelines.

Also, some parents have received a promotion or slight salary increase and then no longer qualify for the choice program. Such situations result in a net loss of income for parents who are working hard to improve their conditions.

Situations such as these are unjust and can be partially remedied by passing the proposal before you. You can be the hero of many children and parents by remedying this today.

Thank you for taking the time to read our petition. We are hopeful as we await the outcome of this hearing and final votes.

Dear members of the Joint Finance Committee:

We, the under-signed parents, encourage you to support the proposal before you to raise the entry-level income for parents seeking to participate in the choice program. We also encourage you to endorse and support the efforts to ensure that parents using the MPCP aren't dropped from the program for minor increases in income.

Dear members of the Joint Finance Committee:

I am very much in support of providing protection for parents with children in the Milwaukee Parental Choice Program. I would like you to pass the proposals for removing penalties related to increased income and to raise the lower limit for admission into the choice program from 175% of poverty to 185%.

Neither proposal will cost more in the long run because there is a cap on the number of participants who may take advantage of the MPCP. Both proposals make sense because they encourage parents to improve both their financial situation and the education of their children. Both proposals encourage parents to move up the economic ladder by ensuring that they will be able to choose the best school for their children and the job that pays the best.

Thank you very much for considering my opinion. I will be eagerly watching the outcome of this debate.

Sincerely,
