INTRODUCTION

1997 Wisconsin Act 27 created the first statewide inter-district open enrollment program in Wisconsin.¹ The program consists of two parts: full-time inter-district open enrollment and part-time inter-district open enrollment.

This report is prepared pursuant to Wisconsin Statutes § 118.51 (15) (c) which requires the Department of Public Instruction to:

Annually submit a report to the governor, and to the appropriate standing committees of the legislature under s. 13.172 (3), on the number of pupils who applied to attend public school in a nonresident school district under this section [the full-time inter-district public school open enrollment program], the number of applications denied and the bases for the denials, and the number of pupils attending public school in a nonresident school district under this section.

The report provides more than the minimum information required by the statute, including: a description of the program, tables showing the number of applications and transfers by grade, by CESA, by race, and by special education status. In addition, the report provides summary information such as the number of school districts in which more than 4% of resident students transferred out, the number in which more students transferred into the district than out of the district (and vice versa), etc.

The report provides information about appeals of school district denials of open enrollment applications, including: reasons for denial and outcomes of the appeals.

The report also provides information about the number of low-income parents who received transportation reimbursement, including the total amount of transportation reimbursement paid, the average reimbursement per student and the average number of miles students were transported.

The report also contains 1998-99 and 1999-2000 information about the part-time inter-district open enrollment program.

Seven appendices provide much of the above data on an individual school district basis.

This report also contains summary information about the part-time inter-district public school open enrollment program.

The report was prepared by Mary Jo Cleaver, Public School Open Enrollment Consultant, with assistance from Scott Eagleburger, IS Resources Support Technician, and Bob Soldner, Director, School Management Services.

The public school open enrollment web site at www.dpi.state.wi.us/dpi/dfm/sms/psctoc.html provides general and specific information about the open enrollment program, including: an informational brochure for parents, application forms and instructions, text of the open enrollment statute and administrative rule, informational bulletins for school district administrators, the open enrollment timetable, frequently-asked questions and other information.

Questions related to this report or to the open enrollment program should be directed to the following DPI staff:

¹ The full-time open enrollment statute is found at Wisconsin Statutes § 118.51. Administrative rules implementing the program are found at Wisconsin Adm. Code § PI 36.

EXECUTIVE SUMMARY AND ANALYSIS

Full-Time Open Enrollment

This is the second annual report for the Wisconsin public school open enrollment program. Two years may still be too early to have established any trends or to draw any firm conclusions about the program. This analysis will make comparative observations about the first and second years of the program, without attempting to draw any conclusions. It should further be noted that this is a quantitative, not a qualitative, analysis and report. We do not believe the report data alone support the drawing of any conclusions about reasons for student transfers, parental satisfaction with the program, or any non-fiscal effect of the program on school districts.

The second year of open enrollment saw growth in nearly all areas of the program.² The total number of applications to transfer increased 12.9%, from 5,926 applications for the 1998-99 school year to 6,691 for the 1999-2000 school year. The total number of transfers increased 97.2%, from 2,464 to 4,858.

Participation by low-income students increased, as far as can be measured by application for and receipt of transportation reimbursement.³ In the 1998-99 school year, 142 students in 94 families received reimbursement for their open enrollment transportation costs, with total reimbursement equaling \$80,467. In the 1999-2000 school year, this rose to 243 students in 149 families, with total reimbursement equaling \$135,000. However, low-income students as a percent of all transfers dropped, from 5.8% to 4.2%.

Participation by students with disabilities also increased, both numerically and as a percent of total participation. The number of applications from students with disabilities increased 14%, from 580 in 1998-99 to 666 in 1999-2000; the number of transfers increased 114.6%, from 171 in 1998-99 to 367 in 1999-2000. Applications from students with disabilities represented 9.8% of all applications in 1998-99 and 9.9% in 1999-2000, while transfers of students with disabilities represented 6.9% of all transfers in 1998-99 and 7.5% in 1999-2000.

More students' applications were approved for 1999-2000 than for the previous year. The rates of denial⁴ of applications dropped from 1998-99 to 1999-2000, although students who need special education continue to be denied at a higher rate than regular education students. Denials of applications by nonresident districts dropped slightly from 19.6% to 19.3%, while denials by resident districts dropped from 9.2% to 2.8%. The dramatic decrease in denials by resident districts was due largely to the Milwaukee School District's decision not to deny any transfers due to racial imbalance. Nonresident district denials of special education students dropped from 35.5% to 29.7% while resident district denials of special education students dropped from 22.1% to 13.8%.

It is difficult to analyze participation by minority students in the program, since the majority of inter-district minority student transfers occur under the chapter 220 desegregation program in the Milwaukee and suburban areas, rather than under open enrollment. However, minority student interest in open enrollment was not limited to minority students applying to leave Milwaukee. Of 478 minority student applications and 208 transfers in 1998-99, 17-18% were residents of Milwaukee. Applications of Milwaukee resident minority students increased in 1999-2000, so that about 40% of the 677 minority student applications and 29% of the 446 minority student transfers were Milwaukee residents.

The percent of transfers to applications is an interesting statistic that may bear watching over time. In 1998-99, 44.7% of students who applied to open enroll actually transferred. An examination of "eligible" students (that is, students who were either approved or not denied by both districts) raises this to 56.4%. In 1999-2000, the follow-through rate increased somewhat, with 50.8% of all applicants and 65.8% of "eligible" applicants actually transferring.

² 1998-99 data used in comparisons are from the 1998-99 report, which is available at the open enrollment web site. A limited number of copies are available from the Department of Public Instruction.

³ Some school districts provided transportation and some eligible parents may not have applied for transportation reimbursement, so it is likely that the number of low-income participants may be higher than the transportation reimbursement data indicate.

⁴ Because of the way approvals were reported in the 1998-99 report and because of the fact that resident districts are only required to act on denials, it is not possible to compare approval rates from 1998-99 to 1999-2000. Thus, denial rates were compared instead.

It will also be interesting to watch the length of time individual students continue to open enroll. There is only one year of data so far. Of the 4,858 transfers in 1999-2000, 1,773 (of a possible 2,464) were continuing from 1998-99 and 3,085 were new applicants. Thus, 72% of 1998-99 students continued open enrollment in the 1999-2000 school year.

Open enrollment is a statewide program, with transfers either in or out occurring in all but 12 districts in 1998-99 and all but two districts in 1999-2000. Regional participation, by Cooperative Educational Service Agency (CESA) area, was relatively proportional to each region's percent of state enrollment, although there are some variations. For example, the CESA 1 area (that includes Milwaukee and its suburbs) has about 30% of the state's enrollment. Applications to school districts in CESA 1 represented about 19% of the statewide total in 1998-99 and about 24% in 1999-2000. The CESA 11 area (that includes Turtle Lake) represents about 5.4% of the state's enrollment. Applications to districts in the CESA 11 area represented about 5.5% in 1998-99 and 8.2% in 1999-2000.

Students applied at all grade levels, but five-year-old kindergarten, ninth and eleventh grades saw the greatest percent of applications in both years. About 62-63% of students applied for elementary grades (pre-kindergarten to grade 8) and about 37-38% applied for high school grades. In 1998-99 the actual transfers followed a pattern similar to that of the applications. However, in 1999-2000, the most transfers were in five-year-old kindergarten, with the next highest transfers somewhat evenly spread across first, ninth, tenth and eleventh grades.

Open enrollment is funded by a transfer of funds from the resident to the nonresident district for regular education students (for special education, the resident district pays the nonresident district directly). A total of \$9.5 million was transferred from resident to nonresident districts in 1998-99. This increased to \$19.6 million in 1999-2000. The 105% increase was a result of increased participation in the program as well as an increase in the per pupil transfer amount from \$4,543 to \$4,703.

Open enrollment is still a relatively small program, with 1999-00 transfers equal to slightly more than one-half of one percent of statewide public school enrollment. The 4,858 open enrollment transfers in 1999-2000 compare to 5,541 inter-district chapter 220 transfers; 7,609 students participating in the Milwaukee private school parental choice (voucher) program; and 21,134 students enrolled in home-based private education programs. However, interest in the open enrollment program is clearly growing. A total of 7,615 applications were submitted for the 2000-01 school year, a 13.8% increase over 1999-2000 applications.

Part-Time Open Enrollment

This is the first year in which the open enrollment report contains summary information about the part-time open enrollment program. School districts report participation in the part-time open enrollment program on the school performance report. Individual school district information may be viewed at the Department of Public Instruction internet web site at www2.dpi.state.wi.us/spr.

A total of 76 courses were taken in 1998-99 and 41 courses were taken in 1999-2000. An individual student may take up to two courses at one time, so the number of courses does not provide the total number of participating students. Students took courses in areas of agriculture, art, business, driver education, English/language arts, foreign language, mathematics, music, physical education, science, social studies and technology. Courses ranged from basic level, such as music/keyboarding 1, Spanish 1 and beginning computer science; to advanced placement courses in macroeconomics, calculus, biology and U.S. history.

Thirty-one nonresident districts had part-time students taking courses in either 1998-99 or 1999-2000 or both; those students came from thirty-four resident districts.

Public School Open Enrollment
July, 2001

THE FULL-TIME PUBLIC SCHOOL OPEN ENROLLMENT PROGRAM

I. DESCRIPTION OF THE FULL-TIME OPEN ENROLLMENT PROGRAM

A. Applications, Approval and Denial, Reapplication

Under the full-time open enrollment program, students in grades kindergarten (including 4-year-old kindergarten⁵) to 12 may apply to attend any public school district in the state. Parents may apply for children to attend prekindergarten, early childhood education and school-operated day care only if the child's resident school district offers the same type of program and if the child is eligible for the program.

The statute sets out a specific schedule for application, notification of acceptance and denial, appeal, and notification of intent to attend.⁶

School districts may deny students' applications only for specific criteria set forth in the statute:

- A nonresident school district (the district the student wishes to attend) may deny a student's application only for the following reasons (and only if specified in school district policy):
 - If space is not available in the school, program, class or grade the student would attend. If there are more applications than there are spaces available, the nonresident school district must accept or reject applications on a random basis, except the school board must give preference to students who are already attending school in the nonresident school district and to their siblings.
 - If the student has been expelled during the current or two preceding school years (or whether disciplinary proceedings are pending) for certain violent offenses.⁷ In addition, a school district may deny a student's enrollment if the student is currently serving an expulsion that extends into the school year for which the student has applied for open enrollment.⁸
 - If the student has been referred for a special education evaluation, but has not yet been evaluated.
 - If the special education and related services required by a student's individualized education program are not available in the school district or if there is no space in the special education program or related services required by the student's individualized education program.
 - For school districts that participate in the chapter 220 integration transfer program, if accepting the student would increase racial imbalance in the school district.
- A resident school district (the school district in which the student resides) may deny a student's application only for the following reasons (and only if specified in school district policy):
 - The school board may limit the number of students transferring out of the school district under open enrollment to a specified percent of its enrollment. In the first year of the program, the statute permitted a resident school board to limit transfers out to 3% of its enrollment. This percent increases one percent each year until it reaches 10% in the 2005-06 school year, after which there is no limit on the percent of students who may transfer out. The allowable percent limit for the 1999-2000 school year was 4%.

⁵ 1999 Wisconsin Act 117 provides that, beginning with open enrollment applications for the 2001-02 school year, a student may participate in open enrollment for 4-year-old kindergarten only if the student's resident district also offers 4-year-old kindergarten and the student is eligible for the program in the resident district. However, in the 1999-2000 school year, students were still permitted to open enrollment for 4-year-old kindergarten without the requirement that the resident district offer the same type of program.

⁶ See Wisconsin Statutes § 118.51 (3)

⁷ See Wisconsin Statutes § 118.51 (5) (a) 2.

⁸ See Wisconsin Statutes § 120.13 (1) (f)

- If the costs of the special education and related services required by the student's individualized education program would impose an undue financial burden on the resident school district.
- For school districts that participate in the chapter 220 integration transfer program, if accepting the student would increase racial imbalance in the school district.

Once a student is accepted into a nonresident school district under open enrollment, the student may be required by the nonresident school board's policy to reapply one time—and one time only—prior to the beginning of middle school, junior high school or high school.

Open enrolled children with disabilities may be required to return to the resident school district:

- If the student's newly-created or revised individualized education program requires special education or related services that are not available in the nonresident school district;
- If there is no space in the special education and/or related services required by the newly-created or revised individualized education program; or
- If the cost of providing the special education and/or related services required by the newly-created or revised individualized education program imposes an undue financial burden on the resident school district.

B. Appeals

If an application was denied by either the nonresident or resident school district, the parent or student may appeal the denial to the Department of Public Instruction within 30 days of receiving the notice of denial. The Department is required to uphold the school board's decision unless the Department finds that the decision was arbitrary or unreasonable.

C. Funding

Funding for regular education open enrollment is accomplished by transferring state aid from the resident to the nonresident school district. The amount of state aid transferred for each regular education open enrollment student is equal to the statewide average per pupil cost for regular instruction, co-curricular activities, instruction support services and pupil support services in the previous school year. For the 1999-2000 school year, this open enrollment student transfer amount was \$4,703.

The money transferred under open enrollment is not considered in determining a school district's revenue limit. That is, a resident school district may not raise its tax levy to replace the loss of state aid for students enrolling in other school districts. Conversely, a nonresident school district receiving a student is not required to reduce its revenue limit by the amount of the state aid increase.

Funding for special education open enrollment is accomplished by a direct payment from the resident school district to the nonresident school district. The payment may either be calculated according to the statutory tuition calculation⁹ or may be an amount agreed to by the school boards of the nonresident and resident school districts.

D. Transportation

Transportation from one school district to another under open enrollment is the responsibility of the parents. The exception to this provision requires the nonresident school district to provide transportation if the individualized education program for a student with a disability requires that transportation be provided. (In this case, transportation is a related service, the cost of which may be billed to the resident school district as part of the tuition calculation.)

Parents of low-income students (that is, students who are eligible for free or reduced-price meals under the federal school lunch program) may apply to the Department of Public Instruction for reimbursement of the cost of transporting the child to and from school under open enrollment. The maximum amount of reimbursement per child is three times

⁹ See Wisconsin Statutes § 121.83

the state average transportation cost per student. The maximum amount per student was \$986.22 in the 1999-2000 school year.

Either the nonresident or the resident school district *may* choose to provide some transportation to open enrollment students. However, the nonresident school district is prohibited from picking up or dropping off a student within the boundaries of the student's resident school district. Only the nonresident school district may receive state categorical transportation aid¹⁰ for transporting open enrollment students.

II. SUMMARY DATA ON APPLICATIONS; APPROVALS AND DENIALS; AND TRANSFERS

The following tables provide summary data on open enrollment applications and school district actions on the applications. Data by individual school district are contained in the appendices. Some notes on the data:

- Unless otherwise noted, the total number of applications to transfer into a district includes duplicates, while the total number of applications out does not include duplicates. Some students applied to attend multiple school districts. For example, if a student lives in Milwaukee and applies to attend Menomonee Falls and Wauwatosa, there would be two applications to transfer in—once to Menomonee Falls and once to Wauwatosa. However, the student would only be counted once as an applicant to transfer out of Milwaukee.
- The number of transfers includes only those students who actually transferred from one school district to another. Since a student can attend only one school district at a time, the number of actual transfers does not include duplicates.
- District and statewide "enrollment" means the enrollment of resident students on the third Friday in September, 1998. This is because the percent limitation that resident school districts may impose on transfers out is based on that enrollment. As a result, applications and transfers are compared to enrollment for the September prior to the school year in which the student transfers under open enrollment.

A. Applications – Approvals, Denials and Reasons for Denial

1. *Number and Reasons for Denial by Nonresident School Districts*

	Total Number	Percent of Total Applications
Total Applications	6,691	
Total Approved*	4,774	71.3%
Total Denied	1,291	19.3%
Approval or Denial Not Reported	626	9.4%

Reasons for Denial	Total Number*	Percent of Total Denied
• Space Not Available	1,135	87.9%
• Special Education Not Available or Special Education Space Not Available	64	5.0%
• Racial Imbalance	8	.6%
• Other**	56	4.3%
• Student Expelled	26	2.0%

* Total number of "Reasons for Denial" may not equal total number of denials, because students may have been denied for more than one reason, or the district may have reported the denial, but not the reason for the denial. Thus, the percents of total denied may not add to 100%.

** "Other" reasons for denial would include reasons such as late application, ineligibility due to age, or student's resident district does not offer a prekindergarten, early childhood or day care program similar to the one for which the student applied.

¹⁰ See Wisconsin Statute § 121.58 (2).

2. *Number and Reasons for Denial by Resident School Districts*

	Total Number	Percent of Total Applications
Total Applications (unduplicated)	6,075	
Total Approved or No Action Taken*	5,902	97.2%
Total Denied	173	2.8%
Reasons for Denial	Total Number**	Percent of Total Denied
• Racial Imbalance	5	2.9%
• Undue Financial Burden	90	52.0%
• Percent Limit	35	20.2%
• Other**	37	21.4%

* Resident school districts are not required to take action and provide notice of approval of an application, so, for purposes of this report, it is assumed that any application not reported as denied was approved. However, it is possible that some applications in the "Total Approved or No Action Taken" category may actually have been denials.

** Total number of "Reasons for Denial" may not equal total number of denials, because students may have been denied for more than one reason, or the district may have reported the denial, but not the reason for the denial. Thus, the percents of total denied may not add to 100%.

*** "Other" reasons for denial would include reasons such as late application, ineligibility due to age, or student's resident district does not offer a prekindergarten, early childhood or day care program similar to the one for which the student applied.

B. Applications and Transfers

1. *1999-2000 Applications and Transfers of 1999-2000 Applicants*

	Duplicated	Unduplicated	Eligible*
Total 1999-2000 Applications	6,691	6,075	4,685
Total 1999-2000 New Transfers	3,085	3,085	3,085
Percent of New Transfers to New Applications	46.1%	50.8%	65.8%

* "Eligible" means the application was approved by the nonresident district and was not denied by the resident district. Since not all districts reported all approval and denial information, it is possible that more or fewer applications were eligible. If all actions not reported by the nonresident district are counted as approved, the total eligible applications is 5,270 and the percent of new transfers to new applications is 58.54%.

2. *Cumulative and Continuing Transfers*

	New Applicants	Continuing from Prior Year	Total	Percent Change
1998-99 Transfers	2,464		2,464	
1999-00 Transfers	3,085	1,773	4,858	97.2%

3. *New Applications and Cumulative Transfers by Grade*

Grade	New Applications (Unduplicated)	Percent of Applications	Total Transfers (New Applicants & Continuing Students)	Percent of Transfers
PK, K4, ECE*	294	4.8%	166	3.4%
K5*	948	15.6%	582	12.0%
1	363	6.0%	455	9.4%
2	269	4.4%	268	5.5%
3	325	5.4%	257	5.3%
4	296	4.9%	240	4.9%
5	312	5.1%	258	5.3%
6	309	5.1%	262	5.4%
7	328	5.4%	276	5.7%
8	321	5.3%	284	5.8%
9	758	12.5%	450	9.3%
10	458	7.5%	455	9.4%
11	623	10.3%	470	9.7%
12	458	7.5%	429	8.8%
Unknown**	13	.2%	6	0.1%
Totals	6,075	100.0%	4,858	100.0%

* PK—prekindergarten; K4—four-year-old kindergarten; ECE—early childhood education (special education); K5—five-year-old kindergarten

** Unknown—grade not listed on application or ungraded

4. *New Applications and Cumulative Transfers by Cooperative Education Service Agency (CESA)*

CESA # & Location	Percent of State Enrollment	New Applications In (Unduplicated)	Percent of Applications	Total Transfers In (New Applicants & Continuing Students)	Percent of Transfers
1 West Allis	30.4%	1,482	24.4%	925	19.0%
2 Milton	15.7%	1,129	18.6%	902	18.6%
3 Fennimore	2.7%	228	3.8%	176	3.6%
4 West Salem	4.2%	258	4.2%	256	5.3%
5 Portage	6.7%	387	6.4%	378	7.8%
6 Oshkosh	11.3%	656	10.8%	565	11.6%
7 Green Bay	9.6%	605	10.0%	505	10.4%
8 Gillett	3.0%	262	4.3%	192	3.9%
9 Tomahawk	4.3%	183	3.0%	178	3.7%

5. *New Applications and Cumulative Transfers by Race*

Data on transfers by race should be interpreted cautiously, for several reasons. First, not all parents indicated the child's race on the application form. Second, the chapter 220 integration transfer program in the Milwaukee area permits minority students to transfer out of Milwaukee to suburban districts and nonminority students to transfer into Milwaukee from suburban districts. Thus, a number of inter-district transfers take place outside of the open enrollment program and are not included in the statistics for open enrollment. Since more minority students than non-minority students transfer under the chapter 220 program, the apparent disparity in participation of minority students in inter-district transfer programs may appear greater than if chapter 220 transfers were included.

Race	Percent of State Enrollment*	New Applications (Duplicated)	Percent of Applications	Total Transfers (New Applicants & Continuing Students)	Percent of Transfers
American Indian/Alaskan Native	1.4%	153	2.3%	117	2.4%
Asian/Pacific Islander	3.1%	120	1.8%	61	1.3%
Black, Not of Hispanic Origin	9.8%	332	5.0%	135	2.8%
Hispanic	3.8%	142	2.1%	86	1.8%
White, Not of Hispanic Origin	81.9%	5,522	82.5%	4,217	86.8%
More than one race indicated		85	1.3%	47	1.0%
None indicated		337	5.0%	195	4.0%
Totals	100.0%	6,691	100.0%	4,858	100.1%

* September 1998

6. *Miscellaneous Data About School District Experiences with Open Enrollment*

Number of School Districts in Which:	
• New applications plus prior transfers exceeded 4% of enrollment	26
• More than 4% of students actually transferred out	4
• Net transfers out greater than 4%	1
• More new students applied to transfer in than transfer out	194
• More new students applied to transfer out than transfer in	199
• The same number of students applied to transfer in as applied to transfer out	33
• More students transferred in than transferred out	195
• More students transferred out than transferred in	175
• The same number of students transferred in as transferred out	21
• No new students applied to transfer in	15
• No new students applied to transfer out	11
• No new students applied to transfer in or out	2
• No students transferred in	24
• No students transferred out	13
• No students transferred in or out	2

C. Special Education Applications and Transfers

1. *Number and Reasons for Denial of Students with Disabilities by Nonresident School Districts*

	Total Number	Percent of Total Applications*
Total Applications	667	
Total Approved	395	59.2%
Total Denied	198	29.7%
Approval or Denial Not Reported	73	11.0%
Reasons for Denial	Total Number**	Percent of Total Denied*
• Space Not Available	125	63.1%
• Special Education Not Available or Special Education Space Not Available	57	28.8%
• Racial Imbalance	2	1.0%
• Other**	22	11.1%
• Student Expelled	2	1.0%

* Percents may not add to 100% due to rounding

** Total number of "Reasons for Denial" may not equal total number of denials, because students may have been denied for more than one reason, or the district may have reported the denial, but not the reason for the denial.

2. *Number and Reasons for Denial of Students with Disabilities by Resident School Districts*

	Total Number	Percent of Total Applications
Total Applications (unduplicated)	630	
Total Approved or No Action Taken***	543	86.2%
Total Denied	87	13.8%
Reasons for Denial	Total Number*	Percent of Total Denied*
• Racial Imbalance	0	0%
• Undue Financial Burden	80	91.9%
• Percent Limit	3	3.4%
• Other**	4	4.6%

* Percents may not add to 100% due to rounding.

** "Other" reasons for denial would include reasons such as late application, ineligibility due to age, or student's resident district does not offer a prekindergarten, early childhood or day care program similar to the one for which the student applied.

*** Resident school districts are not required to take action and provide notice of approval of an application, so, for purposes of this report, it is assumed that any application not reported as denied was approved. However, it is possible that some applications in the "Total Approved or No Action Taken" category may actually have been denials.

3. *1999-2000 Applications and Transfers of Students with Disabilities*

	Duplicated	Unduplicated	Eligible
Total 1999-2000 Applications	666	630	353
Total 1999-2000 New Transfers	240	240	240
Percent of New Transfers to New Applications	36.0%	38.1%	68.0%

* "Eligible" means the application was approved by the nonresident district and was not denied by the resident district. Since not all districts reported all approval and denial information, it is possible that more applications were eligible. If actions not reported by the nonresident district are counted as approved, the total "eligible" applications is 410 and the percent of new transfers to new applications is 58.5%.

4. *Cumulative and Continuing Transfers of Students with Disabilities*

	New Applicants	Continuing from Prior Year	Total	Percent Change
1998-99 Transfers	171		171	
1999-00 Transfers	240	127	367	114.6%

5. *New Applications and Cumulative Transfers of Students with Disabilities by Grade*

Grade	New Applications (Unduplicated)	Percent of Applications*	Total Transfers (New Applicants & Continuing Students)	Percent of Transfers
PK, K4, ECE*	32	5.1%	13	3.5%
K5*	46	7.3%	19	5.2%
1	38	6.0%	35	9.5%
2	29	4.6%	21	5.7%
3	48	7.6%	28	7.6%
4	44	7.0%	21	5.7%
5	40	6.4%	26	7.1%
6	38	6.0%	30	8.2%
7	38	6.0%	31	8.5%
8	39	6.2%	20	5.5%
9	69	11.0%	35	9.5%
10	50	7.9%	28	7.6%
11	68	10.8%	34	9.3%
12	48	7.6%	23	6.3%
Unknown**	3	.5%	3	.8%
Totals	630	100.0%	367	100.0%

* does not equal 100% due to rounding

III. APPEALS

A. The Appeals Process

If a student's application is denied by either the nonresident or resident school district, the student may appeal the denial to the Department of Public Instruction within 30 days of receiving the notice of denial. The Department is required to uphold the school board's decision unless the Department finds that the school board's decision was arbitrary or unreasonable.

Upon receipt of an appeal, the Department sends a letter to the school district that denied the application requesting the record of the decision. The record of the decision consists of the school board's policy for approval or denial of full-time open enrollment applications; any administrative procedures used to determine approval or denial; any school board minutes, tapes or transcripts; any committee minutes, tapes or transcripts; and any other information pertaining to the denial of the appellant's application. Both the appellant (parent and/or student) and the respondent (school district) are given the opportunity to submit arguments (briefs).

The Department's role in deciding appeals under the open enrollment program is to ensure that the required statutory procedures were followed, that the school board's policy is in accordance with the statutes, that the school board's decision was based upon one or more of the statutorily-defined grounds and the school board's policy to the extent that the policy is in accordance with the statutes, and that the school board's decision was neither arbitrary nor unreasonable.

B. Appeals Data

1. *Total Number of Appeals*

	Decision Affirmed	Decision Overturned	Appeal Dismissed* or Closed**	Total Appeals
Statewide	111	30	405	546
Milwaukee			320	320
State, excluding Milwaukee	111	30	85	226

2. *Total Appeals by Reason for Denial*

Number of Appeals				
	Decision Affirmed	Decision Overturned	Appeal Dismissed* or Closed	Total Appeals
Space Not Available	69	8	34	111
Special Education Program or Space Not Available or Evaluation Not Completed	19	0	7	26
Other	1	3	8	12
Percent Limit	10	10	0	20
Undue Financial Burden	8	9	36	53
Racial Imbalance-Resident District	4	0	320	324
Total Appeals	111	30	405	546

* Appeals were dismissed if: the parent withdrew the application, the parent and the district reached informal resolution, the district reversed its decision, or the appeal was untimely.

** Five appeals were either invalid or opened in error and were, therefore, closed without action.

Milwaukee Public School District

Following the 1998-99 action by the Department to overturn its denials based on racial imbalance (see 1998-99 report), the Milwaukee School Board calculated its racial balance and adopted policies that would allow students to transfer out in the same proportion. Thus, the district approved one non-minority student to transfer out for every four minority students who applied to transfer out, and denied all other non-minority students. Three hundred twenty of those denied students appealed to the Department. However, following school board elections in March, the Milwaukee School Board adopted a new policy that defined racial balance more broadly and allowed many more non-minority students to leave. The school board reversed the previous denials and all non-minority students who applied to transfer out of the district in the 1999-2000 school year were permitted to do so. Upon notification that the Milwaukee School Board had reversed its denials, the Department dismissed the appeals.

IV. FUNDING

Funding for regular education open enrollment is accomplished by transferring state aid from the resident to the nonresident school district. The amount of state aid transferred for each regular education open enrollment student is equal to the statewide average per pupil cost for regular instruction, co-curricular activities, instruction support services and pupil support services in the previous school year. For the 1999-2000 school year, this open enrollment student transfer amount was \$4,703.

A total of \$19,609,504 was transferred from resident to nonresident school districts on behalf of regular education students (see Appendix B for district list of amounts transferred). Data are not available on the amount of tuition that was paid by resident school districts to nonresident school districts for the open enrollment of 367 students who received special education.

V. REIMBURSEMENT OF TRANSPORTATION COSTS OF LOW-INCOME PARENTS

Low-income parents (that is, parents of students who are eligible for free or reduced-price meals under the federal school lunch program) may apply to the Department of Public Instruction for reimbursement of the cost of transporting the child to school for open enrollment. The statute provides that the maximum amount of reimbursement per child is three times the state average transportation cost per student. The maximum was \$986.22 per student in the 1998-99 school year.

Parents who requested transportation reimbursement were required to submit a claim to the department that provided information about family size and income (to determine eligibility) and information about the cost of the transportation. Reimbursement was equal to 19 cents a mile (when transportation was provided by a family vehicle) or the actual cost of the transportation (when transportation was provided by other means, such as public transportation or contract with the school district).

Data on transportation reimbursement are as follows:

Total number of families receiving transportation reimbursement	149
Total amount of transportation reimbursement paid	\$135,578
Total students for whom transportation reimbursement was paid	243
Average reimbursement per student	\$557.93
Average miles per round trip	
• Shortest round trip	2 miles
• Longest round trip	98 miles
Number of families whose cost exceeded maximum reimbursement of \$986.22 per student	48
• Total unreimbursed cost	\$36,089.39

THE PART-TIME PUBLIC SCHOOL OPEN ENROLLMENT PROGRAM 1998-99 and 1999-2000

I. DESCRIPTION OF THE PART-TIME OPEN ENROLLMENT PROGRAM

Beginning in the 1998-99 school year, a high school student may take up to two courses at a time in a nonresident school district.

A. Applications, Approval and Denial

The student must apply no later than six weeks prior to the scheduled start of the course.

No later than one week before the start of the course, the nonresident district must notify the student if the application is accepted or rejected and the resident district must notify the student if the application is denied or if the course does not meet the high school graduation requirements in the resident school district. Prior to the start of the course, the parent must notify both school districts if the student will attend.

A nonresident school district may reject an application only for the following reasons, as specified in the school board policies:

- If space is not available in the course. If there are more applications than there are spaces, the school board must accept and reject applications on a random basis.
- Policies and criteria for entry into the course must be the same as those that apply to resident students, except that preference may be given to resident students.

A resident school district may reject a student's application to take a course in a nonresident district only for the following reasons, as specified in the school board policies:

- If the course conflicts with the individualized education program for a student with exceptional educational needs.
- If the cost of the course would impose an undue financial burden on the resident school district.

B. Appeals

If an application is rejected by either the resident or nonresident district, the parent may appeal the rejection to the state superintendent of public instruction within 30 days. The state superintendent must uphold the school board's decision unless that decision is found to be arbitrary or unreasonable. The decision of the state superintendent is final and is not subject to judicial review.

C. Funding

The resident school district must pay the cost of the course, calculated in a manner determined by the DPI, to the nonresident school district. Department of Public Instruction administrative rules¹¹ require the resident school district to calculate its regular education tuition rate and multiply that by the FTE in which the student is enrolled in the course.

D. Transportation

Parents are responsible for transporting students to and from school in the nonresident school district.

¹¹ See Wisconsin Adm. Code § PI 36.09.

Parents whose children are eligible for free or reduced-price meals under the federal school lunch program may apply to the DPI for reimbursement of transportation costs.

Either a nonresident or resident school district may provide transportation in any manner currently permitted in the statutes, but a nonresident school district may not pick up or drop off students within the boundaries of the student's resident district.

II. SUMMARY DATA ON SCHOOL DISTRICTS AND COURSES TAKEN

Information about participation in the part-time open enrollment program is reported by school districts on the School Performance Report. Individual information about school districts, the courses taken, and the number of resident and nonresident students taking courses may be viewed on the Department of Public Instruction internet web site at www2.dpi.state.wi.us/spr.
