Relating to: declaring February, 2003 "American Heart Month in Wisconsin".

Whereas, cardiovascular disease is the nation's and Wisconsin's leading cause of death; over 18,000 Wisconsin residents die from cardiovascular disease annually; and

Whereas, one in five Americans have some form of cardiovascular disease; and whereas nationwide approximately 250,000 Americans die from sudden cardiac arrest each year; and

Whereas, up to 80 percent of these deaths occur in the home; and

Whereas, the research is clear that there are tools available to increase survival rates from sudden cardiac arrest including immediate CIP and use of automatic external defibrillators (AEDs); and

Whereas, effective bystander CPR, provided immediately after a sudden cardiac arrest, can double a victim's chance of survival; and

Whereas, for every minute that goes by without defibrillation, chances of survival decrease 7 to 10 percent; and

Whereas, efforts of the American Heart Association encourage citizens to help save lives by learning the signs of sudden cardiac arrest, calling 9-1-1 if they occur, being trained in CPR, and encouraging comprehensive AED programs in their communities; and

Whereas, the American Heart Association is celebrating February 2003 as American Heart Month with the theme, "Get Hands On and Help Save a Life" and promoting education and awareness by encouraging citizens to learn CPR with just a few hours of training; now, therefore, be it

Resolved by the assembly, the senate concurring, That, the Wisconsin Legislature, in recognition of the importance of the ongoing fight against heart disease, does hereby proclaim February 2003 to be

AMERICAN HEART MONTH IN WISCONSIN

in Wisconsin and urges all citizens to recognize the critical importance of acquiring the tools and skills necessary to help increase survival rates from cardiac arrest and that by encouraging family members, friends, and coworkers to do the same, we can save thousands of lives each year.
