

**DRAFTER'S NOTE
FROM THE
LEGISLATIVE REFERENCE BUREAU**

LRBa0071/1dn
MDK:wlj:rs

February 5, 2003

Representative Gronemus:

Please review this amendment to make sure that it achieves your intent. The amendment refers to “distribution” of electricity or natural gas because I understand that stray voltage arises from how electricity is distributed to customer premises. Also, because you mentioned that stray voltage may also affect natural gas lines, I included the reference to natural gas distribution.

In addition, I referred to the premises of a person receiving electric service, rather than a customer, because I wanted to include members of electric cooperatives, as well as customers of public utilities.
