4 district youth options programs, which allow pupils to attend an institution of
5 higher education under certain circumstances.

Analysis by the Legislative Reference Bureau

Under current law, a pupil enrolled in a public school in the 11th or 12th grade may attend a public or private institution of higher education, including a technical college, for one or more courses under the Youth Options Program. The school board of the district in which the pupil is enrolled is responsible for paying the cost of tuition, fees, and books for the pupil under certain circumstances.

This bill eliminates the mandatory nature of the Youth Options Program. Instead, it authorizes a school district to establish its own youth options program. If a school board establishes such a program, it must adopt a written policy specifying who may participate, the institutions of higher education that a pupil may attend, the kinds of courses that a pupil may take, application procedures, and transportation arrangements. For each pupil attending an institution of higher education under a school district's program, the school district must pay the institution, for each course taken for high school credit, the cost of tuition, course fees, books, and other necessary materials related to the course.
