6 (7) (d), 40.23 (2m) (cm) and 40.285 of the statutes; **relating to:** creating a
7 venture capital investment trust in the public employee trust fund and
8 permitting participating employees in the Wisconsin Retirement System to
9 allocate retirement contributions in the venture capital investment trust.

Analysis by the Legislative Reference Bureau

Under current law, participants in the Wisconsin Retirement System (WRS), depending on their date of initial employment under the WRS, are eligible to have their retirement contributions segregated into a fixed annuity and a variable annuity. Currently, a WRS participating employee may elect to have 50% of his or her retirement contributions segregated into a variable annuity. Contributions segregated for a fixed annuity are invested as part of the fixed retirement investment trust and contributions segregated for a variable annuity are invested as part of the

SENATE BILL 260

variable retirement investment trust. Assets in both trusts are managed and invested by the Investment Board. Assets in the variable retirement investment trust are primarily invested in equity securities, while assets in the fixed retirement investment trust are invested in a number of different investment vehicles. For a WRS participant who has selected the variable annuity option, the value of his or her initial WRS annuity will depend on the investment return on assets in the variable retirement investment trust.

This bill creates a third option that WRS participants may select for their retirement contributions. Under the bill, a WRS participating employee may elect to have 10% of his or her retirement contributions segregated into a venture capital annuity. Contributions segregated for a venture capital annuity are then invested as part of the venture capital investment trust. Assets of the venture capital investment trust are managed by the Investment Board and are required to be invested primarily in equity securities of corporations that are in the venture capital stage. A corporation is considered to be in the venture capital stage if it fulfills all of the following requirements:

1. It has at least 50% of its property and at least 50% of its payroll in this state.
2. It has no more than 500 employees covered by Wisconsin unemployment insurance.
3. It derives no more than 25% of its gross receipts from rents, interest, dividends, and sales of intangible investment assets combined unless the corporation derives less than \$3,000 of that income and has not been incorporated for more than two calendar years.
4. It has not issued stock that is listed on the New York Stock Exchange, the American Stock Exchange, or the National Association of Securities Dealers automated quotation system.
5. It has not liquidated its assets in whole or in part for tax purposes only in order to fulfill certain tax requirements and then reorganized.

Under the bill, if a WRS participant has elected the variable annuity option and the venture capital annuity option, the participant must allocate 40% of his or her retirement contributions for a variable annuity and 10% of his or her retirement contributions for a venture capital annuity; the remaining 50% of the participant's retirement contributions must be allocated for a fixed annuity. If a WRS participant has only elected the venture capital annuity option, the participant must allocate 10% of his or her retirement contributions for a venture capital annuity; the remaining 90% of the participant's retirement contributions must be allocated for a fixed annuity.

This bill will be referred to the Joint Survey Committee on Retirement Systems for a detailed analysis, which will be printed as an appendix to this bill.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
