### ***Analysis by the Legislative Reference Bureau***

Under current law, certain electric and gas utilities are required to make contributions to the Public Service Commission (PSC) in each fiscal year. The PSC deposits the contributions in the utility public benefits fund (fund), which also consists of monthly fees paid by utility customers. The fund is used by the Department of Administration (DOA) to make grants for low-income assistance, energy conservation and efficiency, environmental research and development, and renewable resource programs. The amount that each utility must contribute to the PSC is the amount that the PSC determines that the utility spent in 1998 on its own programs that are similar to the programs awarded grants by DOA.

Under this bill, the PSC may allow a utility to retain a portion of the amount that it is required to contribute in each fiscal year under current law. However, the PSC may allow a utility to do so only if the PSC determines that the portion is used by the utility for energy conservation programs for industrial, commercial, and

agricultural customers in the utility's service area. Also, the programs must comply with rules promulgated by the PSC. The rules must specify annual energy savings targets that the programs must be designed to achieve. The rules must also require a utility to demonstrate that, within a reasonable period of time determined by the PSC, the economic benefits of such a program will be equal to the portion of the contribution that the PSC allows the utility to retain. If the PSC allows a utility to retain such a portion, the utility must contribute 1.75% of the portion to the PSC, which the PSC must deposit in the fund for DOA to use for programs for research and development for energy conservation and efficiency. In addition, the utility must contribute 4.5% of the portion to the PSC for deposit in the fund for DOA to use for renewable resource programs. The bill also requires the PSC to allow a utility to recover in rates any expenses related to administration, marketing, or delivery of services for the utility's energy conservation programs, and prohibits a utility from paying for such expenses from the portion of a contribution the utility is allowed to retain.

The bill also requires the PSC to promulgate rules for the grants made by DOA from the fund for energy conservation and other programs. Under the bill, an applicant is not eligible for such a grant unless the applicant's proposal for the grant complies with rules promulgated by the PSC. The rules must require an applicant to demonstrate that, within a reasonable period of time determined by the PSC, the economic benefits resulting from the proposal will be equal to the amount of the grant. The rules must also specify annual energy savings targets that a such proposal must be designed to achieve.

For further information see the *state* fiscal estimate, which will be printed as an appendix to this bill.
