Section 92.14(6)(b) Wis. Stats., expresses a goal of providing an average of \$100,000 per county for cost-sharing grants. This level of funding would provide approximately \$50,000 per county, assuming 70% of funds are allocated to 71 counties. The balance of funding for cost-sharing is provided through other programs including TRM, priority watershed and grant programs administered through DATCP.</p>

Bill Walker:

DNR's request also included the creation of a bonding appropriation for the proposed program for nonpoint pollution abatement performance standards. We try to keep each budget draft as self-contained as possible to minimize problems when the budget bill is assembled and later amended. Therefore, the bonding for the new program should be included in the draft creating the new program. ✓

Also, I do not remember why there are two bonding appropriations (s. 20.866 (2) (te) and (tf)) for the nonpoint source program. I have a vague idea that this came about because of a veto, but I have not taken the time to go back and investigate. If the intent is that these two appropriations be used for different purposes, they should probably be amended to differentiate between those purposes. Otherwise, it might be preferable to consolidate the two appropriations. Let me know what you think and also if you want me to look into how this came about. ✓

Becky,

Please change this draft so that the increase in 20.866(2)(te) is only 9,546,800 rather than 10,046,800. In other words, reduce the increase by 500,000.

(For my records: This reflects the decision to not provide \$500,000 in bonding authority for cost sharing for notice of discharge recipients, p. 9 Governor's briefing document.)
