5 **relating to:** extending the expenditure period and the life of tax incremental
6 districts in Kenosha.

Analysis by the Legislative Reference Bureau

Under the current tax incremental financing (TIF) program, a city or village may create a tax incremental district (TID) in part of its territory to foster development if at least 50% of the area to be included in the TID is blighted, in need of rehabilitation, or suitable for industrial sites. Before a city or village may create a TID, several steps and plans are required. These steps and plans include public hearings on the proposed TID within specified time frames, preparation and adoption by the local planning commission of a proposed project plan for the TID, approval of the proposed project plan by the common council or village board, and adoption of a resolution by the common council or village board that creates the district as of a date provided in the resolution.

Also under current law, once a TID has been created, the Department of Revenue (DOR) calculates the “tax increment base value” of the TID, which is the equalized value of all taxable property within the TID at the time of its creation. If

SENATE BILL 188

the development in the TID increases the value of the property in the TID above the base value, a “value increment” is created. That portion of taxes collected on the value increment in excess of the base value is called a “tax increment.” The tax increment is placed in a special fund that may be used only to pay back the project costs of the TID. The costs of a TID, which are initially incurred by the creating city or village, include public works such as sewers, streets, and lighting systems; financing costs; site preparation costs; and professional service costs. DOR authorizes the allocation of the tax increments until the TID terminates or, generally, 23 years, or 27 years in certain cases, after the TID is created, whichever is sooner. TIDs are required to terminate, under current law and with one exception, once these costs are paid back, 16 years, or 20 years in certain cases, after the last expenditure identified in the project plan is made or when the creating city or village dissolves the TID, whichever occurs first. Under the exception, which is limited to certain circumstances, after a TID pays off its project costs, but not later than the date on which it must otherwise terminate, the planning commission may allocate positive tax increments generated by the TID (the “donor” TID) to another TID that has been created by the planning commission.

Also under current law, certain TIDs in the city of Kenosha may share their tax increments (donor TIDs) with other TIDs in that city (donee TIDs) if environmental pollution in the donee TID slows development in that TID. Currently, expenditures by a donee TID may be made no later than 12 years after the creation of such a TID, and a donee TID may be allocated tax increments no later than 30 years after the last expenditure identified in the donor TID’s project plan is made, except that in no case may the total number of years during which such expenditures are made and tax increments are allocated exceed 37 years.

Under this bill, expenditures of any TID that is located in Kenosha and that is created before January 1, 2004, may be made no later than 17 years after the creation of such a TID, and a donee TID may be allocated tax increments no later than 35 years after the last expenditure identified in the donor TID’s project plan is made, except that in no case may the total number of years during which such expenditures are made and tax increments are allocated exceed 42 years. The bill also authorizes DOR to allocate tax increments to any TID that is located in Kenosha, and that is created before January 2, 2004, for not longer than 42 years after the TID is created. This bill also specifies that a donor and donee TID must terminate not later than 35 years after the last expenditures identified in their project plans are made.

Generally under current law, during the seven years after a TID is created, a planning commission may adopt an amendment to a project plan to modify the district’s boundaries not more than once. Under this bill, with regard to TIDs in the city of Kenosha that are created before January 2, 2004, a planning commission may adopt an amendment to modify the district’s boundaries by adding contiguous territory to the district as often during the TID’s expenditure period as the planning commission determines is necessary.
