Motion

1. The Joint Committee for Review of Administrative Rules, pursuant to ss. 227.19(4)(d) 6. and 227.26(2)(d), Stats., suspends the following two portions of s. NR 47.913(2)(a):

a. "40 contiguous acres in a compact and regular shape or be of at least".

b. "of publicly owned land surrounded by ineligible land".

[The action of the Joint Committee provides that s. NR 47.913(2)(a) will read: "Be of at least 20 acres."]

2. The Joint Committee for Review of Administrative Rules, pursuant to s. 227.26(2)(f) and (j), Stats., introduces bills in each House of the Legislature to provide that, to be eligible for cost sharing under the gypsy moth suppression program, a proposed treatment block, among other things, must be of at least 20 acres.

~~PRELIMINARY DRAFT - NOT READY FOR INTRODUCTION~~

gypsy moth

g's

1 AN ACT/...; relating to: authorizing the establishment of a program for the
2 suppression of gypsy moths, specifying areas eligible for aerial insecticide
3 treatment for the suppression of gypsy moths, and requiring the exercise of
4 rule-making authority.

Analysis by the Legislative Reference Bureau

Under current law, the department of natural resources (DNR) is authorized to take action that it determines is necessary to detect and control forest pests. If DNR finds that an area of the state is infested by forest pests, it must determine whether certain control measures should be conducted either through cooperative agreements with other state agencies, federal agencies, local governmental units, or individuals or by designating a proposed zone of infestation. If DNR proposes to designate an area as a zone of infestation, it must follow certain procedures including holding a public hearing. If a zone of infestation is established, DNR must conduct certain pest control measures and make efforts to enter into agreements with affected land owners. Current law specifies that, with certain exceptions, if infestation control measures are conducted on land within a zone of infestation, the landowner must pay a certain share of the costs associated with the activities undertaken to control the infestation on the owner's land.

→ This bill provides that if DNR establishes a program for the suppression of gypsy moths, and that program includes the awarding and administering of federal cost-sharing funds for aerial insecticide treatment, DNR must promulgate rules to implement the program. The rules must specify that an area is not eligible for aerial

remove
xtra space

insecticide treatment unless the area is at least 20 acres in size. The bill also specifies that if DNR establishes such a gypsy moth suppression program, the current law provisions that apply to the designation of infestation control zones do not apply to that gypsy moth suppression program.

This bill is introduced as required by s. 227.26 (2) (f), stats., in support of action of the joint committee for review of administrative rules in suspending section NR 47.913(2) (a), Wis. Adm. Code, a rule of DNR, on November 7, 2002. The suspended rule specified that in order for an area to be eligible for aerial treatment with insecticide under a program to suppress the infestation of gypsy moths, the area must be of at least 40 contiguous acres in a compact and regular shape or be of at least 20 acres of publicly owned land surrounded by ineligible land.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

1 SECTION 1. 26.30 (6m) of the statutes is created to read:

2 26.30 (6m) GYPSY MOTH SUPPRESSION. (a) If the department establishes a
3 program for the suppression of gypsy moths, and that program includes the
4 awarding and administering of federal cost-sharing funds to counties for aerial
5 insecticide treatment, the department shall promulgate rules to implement the
6 program. The rules shall specify that an area is not eligible for aerial insecticide
7 treatment under the program unless the area is at least 20 acres in size.

8 (b) Subsections (7) to (10) do not apply to a gypsy moth suppression program
9 established under this subsection.
