Subject: pocan amendment

I can't come up with a good way of identifying the benchmark price in Canada. I don't think "minimum" is good because the manufacturer may sell it to some agency that serves the poor for a below market price. So I think we are stuck with referring to the average price for which a person may purchase the vaccine in Canada. I'm comfortable leaving it at that without saying who has to figure out what the average price is.
