

Fiscal Estimate Narratives

DOT 2/14/2003

LRB Number	03-0898/1	Introduction Number	AB-22	Estimate Type	Original
Subject					
Requiring headlights and other required lamps on vehicles to be lighted when visibility is limited by inclement weather					

Assumptions Used in Arriving at Fiscal Estimate

The proposal:

The enactment of 2003 AB 22 would require headlamps and other required vehicle lights to be lighted when climatic conditions limit visibility. It also requires certain vehicles to be equipped with rear tail lamps whenever climatic conditions limit visibility. Law enforcement officers would not have the authority to stop and cite drivers for violating only these laws; officers would only have secondary enforcement for these violations.

Fiscal impacts:

- 1) There would be no additional costs to motorists since all vehicles must be equipped with the headlamps and tail lamps referred to in the proposal.
- 2) Though it is not possible to estimate the number of these violations, it is estimated that there would be no additional costs to law enforcement to enforce this law. Officers would enforce the law during routine traffic enforcement and no additional training beyond being informed of the new violation as a secondary enforcement would be required.
- 3) Though it is not possible to estimate the number of violations to be recorded with this new law, it is estimated that there would be no additional costs to the Division of Motor Vehicles to record these violations. These violations would be categorized the same as other violations that already exist for lighting requirements during hours of darkness.

Long-Range Fiscal Implications

Unknown
