Fiscal Estimate Narratives DATCP 7/21/2003

LRB Number 03-2	2509/1	Introduction Number	AB-415	Estimate Type	Original			
Subject								
Sale of motor fuel under the unfair sales act								

Assumptions Used in Arriving at Fiscal Estimate

Introduction:

The Unfair Sales Act prohibits sales of merchandise at a price that is less than the seller's "cost". For retail sales of motor vehicle fuel "cost" is defined to include: the average price charged by refiners at the nearest terminal, taxes, transportation and plus a markup of 9.18%. [Please note this description is highly simplified. For a more exact definition, please see s. 100.30(am)1m, Stats.] There are several exceptions granted in the law. The most commonly used exception in retail sales of motor vehicle fuel is the "meeting competition" exception. This allows sellers to sell at a price that is less than "cost" if doing so to meet the "existing price of a competitor". [Please see s. 100.30(2)(cj), stats. for the definition.] Under current law, political boundaries are irrelevant to the meeting competition exception. This bill would require motor vehicle fuel retailers to ignore competitor's prices if that competitor happened to be outside of this state.

Analysis:

All neighboring states have considerably lower gasoline taxes. Wisconsin's Excise Tax (and Inspection Fee) is 31.5ϕ ; whereas Illinois's is 26.8ϕ , lowa's is 20.0ϕ , Minnesota's is 20.0ϕ and Michigan's is 19.0ϕ . Wisconsin retailers have to choose between reducing the price of gasoline - and then hope to make up the difference with in-store sales; or maintaining a markup on gasoline - with the understanding that total sales volume will suffer. This bill would make the former of these two options illegal. We believe that this bill could eventually lead to closure of a considerable number of gas stations (most of which are small businesses) in places like Kenosha, Beloit, La Crosse, Hudson, Superior and Marinette.

Fiscal Effect:

We predict that this bill would result in higher enforcement costs for DATCP. Retailers who perceive that raising their prices would endanger the survival of their businesses will not eagerly comply with the law (as amended by this bill). This would result in an increase in the number of Unfair Sales Act investigations that require additional enforcement actions such as administrative special orders, and civil forfeitures. DATCP investigates alleged violations of the Unfair Sales Act based on complaints. In the last five years, DATCP has received 2,595 complaints involving the sale of motor vehicle fuel. Of these, 75 have resulted in some type of formal enforcement action such as administrative special orders or referral to district attorneys for civil forfeiture actions. We estimate that formal enforcement actions take roughly 25 hours of staff time (including Auditors, Supervisors and Attorneys) above and beyond informal enforcement actions such as warning letters. If the number of formal enforcement actions double, that would be an additional 375 hours of DATCP staff time per year. This would amount to roughly an additional \$11,000 annual costs for Unfair Sales Act enforcement.

Long-Range Fiscal Implications

Fiscal Estimate Worksheet - 2003 Session

Detailed Estimate of Annual Fiscal Effect

State Costs by Category	\boxtimes	Original		Updated		Corrected		Supplemental
