April 16, 2003 – Introduced by Senators SCHULTZ, COWLES, WELCH, WIRCH, DARLING, REYNOLDS and ZIEN, cosponsored by Representatives FREESE, GRONEMUS, GARD, M. LEHMAN, ANSWORTH, J. WOOD, SUDER, OTT, MUSSER, TOWNSEND, HINES, MILLER, OWENS, GIELOW, BIES, MONTGOMERY, HAHN, ALBERS, GUNDERSON, VAN ROY, WASSERMAN, ZIEGELBAUER, MCCORMICK, VRKAS and NASS. Referred to Committee on Environment and Natural Resources.

AN ACT to renumber and amend 168.04; and to create 168.04 (2) and 168.04 (3) of the statutes; relating to: prohibiting methyl tertiary-butyl ether in automotive gasoline, providing an exemption from emergency rule procedures, and granting rule-making authority.

Analysis by the Legislative Reference Bureau

Current law requires the Department of Commerce (Commerce) to set minimum specifications for gasoline, reformulated gasoline, and kerosene and authorizes Commerce to set minimum specifications for other types of fuel.

This bill requires Commerce to set, by rule, minimum specifications for automotive gasoline that prohibit automotive gasoline from containing more than 0.5%, by volume, of methyl tertiary-butyl ether (MTBE). Similarly, the bill requires Commerce, by rule, to prohibit any person from offering for sale, distributing, blending, or manufacturing MTBE as an automotive gasoline additive (except that persons may offer for sale, distribute, blend, or manufacture automotive gasoline containing up to 0.5%, by volume, of MTBE). These prohibitions first apply on August 1, 2004. MTBE is a chemical compound that is added to gasoline, often to boost the gasoline’s octane or to meet clean fuel oxygen requirements.
The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

SECTION 1. 168.04 of the statutes is renumbered 168.04 (1) and amended to read:

168.04 (1) The department by rule shall prescribe minimum product grade specifications for gasoline, automotive gasoline, automotive gasoline additives, as described in sub. (2) (b), reformulated gasoline, as defined in s. 285.37 (1), and kerosene and may prescribe product grade specifications for automotive gasoline, gasoline-alcohol fuel blends, aviation gasoline, fuel oils, and diesel fuels. Automotive gasoline specifications shall include lead content. The rules shall, to the extent feasible, be in conformity with nationally recognized standards, specifications and classifications, such as those published by the American society for testing and materials, the society of automotive engineers and the U.S. environmental protection agency. The department may not promulgate or enforce a rule prohibiting additional information from placement on the dispensing device.

SECTION 2. 168.04 (2) of the statutes is created to read:

168.04 (2) (a) The rule promulgated by the department under sub. (1) to set standards for automotive gasoline shall prohibit automotive gasoline, beginning on August 1, 2004, from containing more than 0.5%, by volume, of methyl tertiary-butyl ether.

(b) The rule promulgated by the department under sub. (1) to set standards for automotive gasoline additives shall prohibit any person from offering for sale, distributing, blending, or manufacturing methyl tertiary-butyl ether as an
automotive gasoline additive in this state, beginning on August 1, 2004. It is not a violation of such a rule for a person to offer for sale, distribute, blend, or manufacture automotive gasoline containing not more than 0.5%, by volume, of methyl tertiary-butyl ether.

**SECTION 3.** 168.04 (3) of the statutes is created to read:

168.04 (3) Except as otherwise provided in this section, rules promulgated under this section shall be in conformity with nationally recognized standards, specifications, and classifications, such as those published by the American Society for Testing and Materials, the Society of Automotive Engineers, and the U.S. Environmental Protection Agency. The department may not promulgate or enforce a rule prohibiting the placement of additional information on the dispensing device.

**SECTION 4. Nonstatutory provisions.**

(1) **Emergency rule.** Using the procedure under section 227.24 of the statutes, the department of commerce shall promulgate the rule described under section 168.04 (2) of the statutes, as created by this act, for the period before the permanent rule becomes effective, but not to exceed the period authorized under section 227.24 (1) (c) and (2) of the statutes. Notwithstanding section 227.24 (1) (a), (2) (b), and (3) of the statutes, the department is not required to provide evidence that promulgating a rule under this subsection as an emergency rule is necessary for the preservation of the public peace, health, safety, or welfare and is not required to provide a finding of emergency for the rule promulgated under this subsection.

(2) **Statement of legislative findings and purpose.** The legislature finds that methyl tertiary-butyl ether may contaminate groundwater through various means, including leaking fuel storage tanks and pipelines, refueling spills, automobile accidents, and improper consumer disposal of gasoline. As a result of its odor and
taste, methyl tertiary-butyl ether can make drinking water supplies undrinkable.

The purpose of section 168.04 (2) of the statutes, as created by this act, is to reduce or eliminate the instances of methyl tertiary-butyl ether contaminating groundwater.

(END)
