2003 SENATE BILL 334

December 3, 2003 – Introduced by Senators HARSDORF and SCHULTZ, cosponsored by Representatives PETTIS, HINES, MCCORMICK and HAHN. Referred to Committee on Energy and Utilities.

AN ACT to renumber 66.0401 (1) (a), 66.0401 (1) (b) and 66.0401 (1) (c); to renumber and amend 66.0401 (1) (intro.); to amend 66.0401 (2); and to create 66.0401 (1b) and 66.0401 (1m) of the statutes; relating to: restrictions imposed on the installation and use of solar energy systems and wind energy systems in cities, villages, and towns that are located on the banks, bluffs, or bluff tops of the Lower St. Croix River between the dam near St. Croix Falls and its confluence with the Mississippi River.

Analysis by the Legislative Reference Bureau

Current law prohibits cities, villages, and towns (local governmental units) and counties from imposing any restriction on the installation or use of a solar energy system or a wind energy system unless the restriction serves to preserve or protect the public health or safety, the restriction does not significantly increase the cost of the system or significantly decrease its efficiency, or the restriction allows for an alternative system of comparable cost and efficiency.

This bill creates an exemption from this prohibition so that a local governmental unit that is located totally or partially in the Lower St. Croix National Scenic Riverway may restrict the installation of a solar or wind energy system at any site within the boundaries of the local governmental unit. The riverway is located between the dam near St. Croix Falls and its confluence with the Mississippi River.
