Identification required for voting in elections										

Assumptions Used in Arriving at Fiscal Estimate

The Elections Board and local election officials will incur costs for poll worker training, voter education, notice and form revision. Because this is a fundamental change in the voting procedure, it will require extensive outreach to voters and local election officials. This activity is not funded and will require planning and coordination among state and local election officials.

The cost for revising, printing and distributing notices and forms is estimated at \$3,500. Information and training materials will require an estimated \$5,000. A statewide election official training initiative will cost an estimated \$23,700. The cost for a voter education initiative related to the proposed change is estimated at \$50,000 before the Fall 2006 elections.

These costs do not include diverting state and local personnel from current responsibilities to implement the change.

Long-Range Fiscal Implications
