### ***Analysis by the Legislative Reference Bureau***

Generally, under current law, a person who operates a motorboat may not operate the boat at a speed that is greater than is reasonable and prudent under the conditions. Furthermore, a person may not operate a motorboat at a speed in excess of posted notices established by regulatory markers. Current law also authorizes municipalities to enact ordinances restricting boat speed. The boat speed restrictions under current statutes and local ordinances generally do not apply to the operator of a patrol boat who is responding to an emergency call or who is pursuing a person suspected of violating the law provided that the patrol boat is using a siren and is being operated in a safe manner. Current law also specifies that if the patrol boat is using a light under these circumstances in conjunction with a siren, the light must be an oscillating or flashing light and must be fitted with a blue lens.

This bill grants certain additional exemptions to patrol boat operators. Under this bill, the operator of a patrol boat who is responding to an emergency call or who is pursuing a person suspected of violating the law is exempt from most boating laws and ordinances when a siren or emergency light is activated, provided that the operator gives due regard to the safety of other persons in the vicinity. The bill also revises current law specifications for emergency lights on patrol boats. The bill provides that if an emergency light is used by a patrol boat, it must be of a type and design specified under federal law.
