

## Fiscal Estimate Narratives

DNR 5/26/2005

LRB Number	05-2739/1	Introduction Number	SB-189	Estimate Type	Original
<b>Subject</b>					
Transfer of natural resources approvals					

### Assumptions Used in Arriving at Fiscal Estimate

#### Bill Summary:

This bill allows a person who is selected under a DNR random or preference selection system for hunting and trapping permits to designate a minor to exercise the license if the person dies before using the license

#### Fiscal Impact:

There would be one-time costs of \$147,400, and ongoing costs of \$26,200 and 0.75 FTE. More detail follows.

This bill would require the Department of Natural Resources to maintain and enter data information into 11 permit programs in order to authorize the transfer of preference points and/or preference categories and approvals to minors who have been identified by a customer as beneficiaries of these points, categories or approvals upon their death.

With customer records totaling approximately 450,000 within these 11 permit programs, it is estimated that in the first year there would be requests from approximately 225,000 customers to designate a minor as the recipient. Assuming 2-4 minutes per record, this would require 5 LTE's working during the first year for a total cost of \$135,000: 5 LTE's (2040 hours each) @ \$12.00/hr = \$122,400 in one-time costs.

Extensive programming costs would be incurred to update, accommodate and maintain records for the preference selection database, the ALIS customer database and related internet application databases. This would require an additional one-time cost of \$25,000.

After the first year, it is assumed there would be ongoing file maintenance and new requests from approximately 30,000 customers. Further maintenance would need to be done when the minor reaches the age of 18 and must be removed as a recipient. There would be a need for .75 FTE for a cost of \$26,200 annually: .75FTE (1530 hours) @17.11/hr.

### Long-Range Fiscal Implications
