State of Wisconsin
Department of Health and Family Services

Jim Doyle, Governor
Helene Nelson, Secretary

January 21, 2005

The Honorable Jim Doyle
Governor
State Capitol, Room 115 East
Madison, WI 53702

Dear Governor Doyle:

Enclosed is a copy of the Child Abuse and Neglect Report 2003 Data, pursuant to s.48.981. The report includes a statistical analysis of suspected child abuse and neglect reports received and investigated by county child protective services (CPS) agencies and the state Bureau of Milwaukee Child Welfare in calendar year 2003. The report also contains information on child fatalities due to child abuse or neglect.

Sincerely,

A handwritten signature in black ink, appearing to read 'Helene Nelson'.

Jim Doyle, Governor
Helene Nelson, Secretary

January 21, 2005

Members of the Wisconsin Legislature
P.O. Box 7882
Madison, WI 53707-7882

To Members of the Wisconsin Legislature:

On behalf of the Department of Health and Family Services, I am transmitting Wisconsin's Child Abuse and Neglect Report for Calendar Year 2003. In many ways, 2003 represents a transition for child welfare in our state.

Governor Jim Doyle and the Department of Health and Family Services place a high priority on keeping children safe in their own homes and providing adequate services when children must be removed to keep them safe. Throughout 2003, the Department joined with county and tribal child welfare agencies to build a statewide consensus for change in our child protection programs. Staff from tribal, county and state government, as well as advocates and private sector providers joined to create a Program Enhancement Plan in order to strengthen the policies and practices that child welfare staff use to respond to abused and neglected children. Our plan was also a response to federal findings that indicated areas in which Wisconsin and all states needed to improve. We completed work on the plan in October 2004 and officially began its implementation on November 1, 2004. Implementation of Wisconsin's plan will be guided by a multidisciplinary team of more than 80 individuals, many of whom were part of the original planning team.

In 2004, Governor Doyle also identified a number of initiatives to enhance child welfare services in Wisconsin through his KidsFirst agenda. These initiatives, as well as the action steps identified in our Program Enhancement Plan, will have a significant impact on the course of child welfare services in the state.

We have much to accomplish over the next two years in order to meet the goals we have identified and we will look to all of our partners, including the state legislature to assist us in accomplishing our tasks. We look forward to working with you in the upcoming legislative session as we identify policy issues to improve how we serve children and families in Wisconsin. We appreciate your support for this important work.

Sincerely,

A handwritten signature in black ink, appearing to read 'Helene Nelson', written over a horizontal line.

Helene Nelson
Secretary

PREFACE

Wisconsin's child welfare system operates from the core belief that all children deserve safe and healthy homes in which to grow, and that children are provided a stable and loving environment when they must be removed from their homes. Over the past several years, we have placed a heightened emphasis on improving the safety and well being of our children and have embarked on a number of initiatives to assess our child welfare system and the services that we provide to children and families. At the same time, the federal government began looking at child welfare agencies across the country through the Child and Family Service Review (CFSR). The CFSR, conducted in Wisconsin in August 2003, looked at a number of outcomes related to the safety, permanence and well-being of children and families in our system as well as how our system functions overall. As a result, this process has provided an opportunity for Wisconsin to increase our knowledge of measurable outcomes for children and families and identify areas of improvement.

Counties, tribes and staff worked together over the course of 2003 and 2004 to develop Wisconsin's Program Enhancement Plan (PEP), which was approved by the federal government in November 2004, to improve child welfare practice and policy throughout Wisconsin. PEP strategies are focused on improving outcomes for children who have been the victims of abuse or neglect, improving their experiences with the child welfare agency while they are in care or are receiving services, and ensuring that child welfare staff is doing its best possible work to support troubled families so that their children may be safely returned home. Important PEP strategies include increasing the involvement of families in their own case plans; developing a statewide policy on screening and assessment of mental health needs of children who have been abused or neglected; increasing support services for foster and adoptive parents; assuring that all agencies comply with the requirements of the Indian Child Welfare Act; surveying the workload requirements of local child welfare agencies; and evaluating the availability and accessibility of services for families. As we implement these PEP strategies, we are dedicated to improving our statewide case management and data collection system, WiSACWIS, so that our data will accurately reflect our successes and our challenges.

As our commitment to improving outcomes for children increases, our approach to improving child protection in our state necessarily becomes more data driven and focused on measurable outcomes. WiSACWIS became a truly statewide system in July 2004 as we helped the last of our 72 counties begin using it in their child welfare agencies. Now, nearly 5,000 staff and supervisors from the public and private sectors utilize WiSACWIS for both case management and data collection in providing child protection and child welfare services. It affords quick, reliable access to information about the individual families and children they serve, and also has the capacity to provide each county and the entire state with performance reports that have not previously been available. It will help us enhance our ability to protect children from abuse and neglect.

The data collected for this 2003 report is drawn and combined from two sources: WiSACWIS and paper Children and Family Service forms (known as CFS-40) from 72 counties. This is the last year for which we will blend paper forms with WiSACWIS data. Consequently, this 2003 report has the appearance and essentially the same content areas as reports of previous years, but a few differences from reports of previous years are notable. We re-tooled the first two major sections into "intake" and "initial assessment" components to better reflect on practice and data issues that are relevant to those stages in the child wel-

fare case process. In anticipation of our PEP implementation, we also introduced a narrative related to “screening” decisions and “service intakes” to describe our progress in screening decisions and timing responses. In addition, you will notice narrative related to the federal safety outcome, including case-work indicators (timeliness of completing the investigations and safety assessment and decision making), as well as data and narrative on the national standards. In this and any statistical report, it is important to note that the reliability of the data is dependent on the accuracy of the information provided by the agencies. In addition, WiSACWIS data is expected to improve over time as county child welfare agencies have more experience using the system.

Each child and family whose statistic is represented in this 2003 Child Abuse and Neglect (CAN) report was served through the hard work, dedication and commitment of Wisconsin’s child welfare workforce. Each county has its own child welfare intake workers, case workers and supervisors who served these families from their initial safety assessments and protective plans, through the development of their case plans and supportive services, through court appearances, family visits, phone calls, documentation, and advocacy. These child welfare staff members are the heart and hands of the child welfare system and may be a child’s best hope for helping his or her parents or caregivers change the circumstances that threaten their safety. Understanding that all Wisconsin child welfare agencies must attract and retain a highly-qualified and effective workforce, the Division of Children and Family Services has begun several initiatives to study the experiences and perceptions of child welfare case managers, supervisors and intake and assessment workers. The effort will initially focus on the Bureau of Milwaukee Child Welfare, but we plan to use the information to assist other counties in attracting, training and retaining staff.

Thank you for your interest in learning more about the safety and well being of Wisconsin’s children and your support for our continuing efforts as we strive for the best outcomes for these children and their families.

Kitty Kocol
Administrator, Division of Children and Family Services
Wisconsin Department of Health and Family Services

INTRODUCTION

The child protective services (CPS) agencies are responsible for identifying and addressing concerns affecting child safety in the home for families who come to the attention of these agencies. In Wisconsin, this critical social responsibility is met through a state-supervised, county-administered system, with the exception of Milwaukee County where the state administers these services. Alleged child maltreatment is reported to 71 county social or human services departments in the state and to the Bureau of Milwaukee Child Welfare (BMCW) in Milwaukee County. Data regarding each report investigated is sent to and compiled by the Division of Children and Family Services to assist state policy makers, service providers and the public in understanding and effectively responding to trends in child maltreatment.

This annual Child Abuse and Neglect report to the Legislature presents state and county specific data on the number of children in calendar year 2003 reported to be abused and/or neglected, as well as the number of allegations substantiated for abuse and/or neglect. Data in this report includes information on only those child abuse and/or neglect reports identified by CPS agencies as potentially being within the parameters of statutory definitions of alleged child maltreatment. These reports are accepted or "screened in" by agencies for investigation.

Not all reports received by agencies are appropriate for a CPS investigation. Although the reporters may have concerns for a child or family, the issues presented in the report may not rise to the level indicated by statutory definitions of maltreatment. These reports are generally not accepted by agencies and therefore, are not subject to an investigation. Referrals that are screened out and not investigated are not included in the data for this report. Families with screened out referrals may still be offered CPS

agency services or referred to appropriate community resources.

The quality of the data in this report is dependent upon the quality and accuracy of data submitted by the local agencies. The data collected for 2003 is from two sources - the Wisconsin Statewide Automated Child Welfare Information System (WiSACWIS) and paper CFS-40 forms. The statewide implementation of WiSACWIS began in 2001 and was completed in July 2004. Use of the new system greatly expands the type of data collected and also improves the timeliness and accuracy of child welfare data. By the end of calendar year 2003, all but twenty-four (24) counties had implemented WiSACWIS, with WiSACWIS data accounting for over 60% of child abuse and neglect reports received during the year. The remainder of the child abuse and neglect information for 2003 is from CFS-40 forms.

The implementation of WiSACWIS has an impact on child abuse and neglect data. Under the new system, the number of child abuse and neglect reports will appear to increase. This difference is likely due to changes in the way reports and re-referrals on open cases are documented in WiSACWIS as compared to the manual CFS-40 form process. WiSACWIS links a report to an individual reporter. As such, a single incident of alleged maltreatment may be recorded more than once if there are multiple reporters for the alleged incident.

State laws and policies concerning child maltreatment pertain to children 17 years of age or less, unless otherwise specified. Child maltreatment is generally divided into four basic types: physical neglect, physical abuse, sexual abuse and emotional abuse. Threats of child abuse and neglect must also be reported to and investigated by the county agencies and BMCW.

These cases are categorized as maltreatment that is likely to occur.

Physical neglect is defined in the statutes as “failure, refusal or inability on the part of a parent, guardian, legal custodian or other person exercising temporary or permanent control over a child, for reasons other than poverty, to provide necessary care, food, clothing, medical or dental care or shelter so as to seriously endanger the physical health of the child.”

[Ref. s. 48.981(1)(d), Wisconsin Stats.]

Physical abuse is defined as “physical injury inflicted on a child by other than accidental means.” [Ref. s. 48.02(1)(a), Wisconsin Stats.] This includes non-accidental injury inflicted by any other person. “Physical injury includes but is not limited to lacerations, fractured bones, burns, internal injuries, severe or frequent bruising or great bodily harm, as defined in s. 939.22(14).” [Ref. s. 48.02(14g), Wisconsin Stats.]

Sexual abuse is defined by cross-referencing several crimes in the Wisconsin Criminal Code section of the Statutes (see Appendix B). In summary, sexual abuse includes the following:

- sexual intercourse or sexual contact with a child 15 years of age or less;
- sexual intercourse with a 16- or 17-year old child without his or her consent;
- inducement of a child to engage in sexually explicit conduct in order to videotape, photograph, etc., that child or videotaping, photographing, etc., a child for such purposes, or producing, distributing, selling or otherwise profiting from such a videotape, photograph, etc.;
- encouragement by or permission of a person responsible for a child's welfare for a child to engage in sexually explicit conduct for the purpose of videotaping, photographing, etc.;
- causing a child to view or listen to sexual activity;

- exposing genitals to a child; or
- permitting or encouraging a child to engage in prostitution.

Emotional abuse is defined as “emotional damage for which the child's parent, guardian or legal custodian has neglected, refused or been unable for reasons other than poverty to obtain the necessary treatment or to take steps to ameliorate the symptoms.” [Ref. s. 48.02(1)(gm), Wisconsin Stats.]

The definitions of child neglect and emotional abuse involve failure on the part of parents or other persons responsible for a child to provide necessary care for a child. The definitions of physical abuse and sexual abuse include harm to a child by any person. Therefore, physical or sexual abuse of a child can include assaults by a parent, strangers, persons unrelated to a child's family, or peers. In cases where someone outside of the family harms the child, interventions with the family do not provide all of the solutions. In many of these cases, in addition to the CPS investigation, law enforcement is involved and criminal prosecution of the person who harmed the child may occur.

In most child abuse and neglect cases, the parties involved are family members and solutions involve interventions with the family. In some of these cases, court intervention is required to assure safety and order services for the family.

Public perception of what constitutes child maltreatment generally is limited to harm caused by a child's parents or other family or household member. In Wisconsin, child maltreatment investigations are performed in cases where physical injury to a child or sexual contact with a child is alleged regardless of the alleged maltreater's relationship to the child. Based on the statistics generated from these types of maltreatment, the category where the data is most influenced by non-familial maltreatment is the

category of sexual abuse. Wisconsin totals include a number of cases of sexual assault by peers (from unwanted touching to "date rape"). Tables in the report show totals that allow the reader to distinguish between abuse of a child by a caregiver and assault of a child by another person. Sexual abuse also includes mutual sexual activity between minors if at least one of the minors is less than 16 years of age. The fact that there may have been no coercion, exploitation or assault involved is irrelevant to whether the incident is investigated as sexual abuse under Wisconsin Statutes. Cases involving mutual sexual activity between minors ranges from pre-school aged children who inappropriately touch other pre-school aged children in ways inconsistent with normal child development to teenagers who are sexually active.

In several of the report's graphs and tables, where noted, cases of mutual sexual activity have been removed from the total numbers of

child maltreatment. This gives a more informed depiction of maltreatment by primary and other types of caregivers.

Information in this report reflects data reported during calendar year 2003. Data for this period includes some cases in which the alleged maltreatment occurred in a previous year but was reported and investigated in the following calendar year. Information is relayed almost entirely through graphs and tables. Totals cited in graphs, tables and text throughout this report might not always be consistent. These inconsistencies in data may be due to the following factors:

- Multiple forms of maltreatment associated with a single report or investigation;
- Multiple maltreaters identified with a single incident of maltreatment; and,
- Multiple reporters associated with a single maltreatment incident in non-WiSACWIS counties only.

HISTORICAL TRENDS

FIGURE 1 NUMBER OF REPORTS OF CHILD MALTREATMENT, 1993-2003

FIGURE 2 REPORTS BY TYPE OF ALLEGATION, 1999-2003*

* Note: Totals for sexual abuse for 1999 through 2003 are meant to exclude reports of mutual sexual activity between peers (see page 5 for explanation).

2003 CHILD MALTREATMENT CHILD PROTECTIVE SERVICES ACCESS/INTAKE

Certain individuals whose employment brings them into contact with children are required by law to report any suspected abuse or neglect to a child seen in the course of their professional duties. These individuals are referred to as "mandated reporters." However, anyone who suspects a child is being maltreated may make such a referral. Persons making reports in good faith are immune from criminal or civil liability. More information about reporting suspected abuse or neglect is available on the Internet at <http://dhfs.wisconsin.gov/Children/CPS/>

Table 1 describes the profession or relationship to the child of persons who reported suspected child maltreatment in CY 2003.

Wisconsin's child welfare service delivery system requires any concerned individual to report suspected abuse or neglect directly to the local child welfare agency or law enforcement (See listing of where to report in Appendix A). Any report of alleged child maltreatment received by law enforcement officials must subsequently be referred to the local child welfare agency.

Upon receiving a report, the child welfare agency must first determine if the information constitutes an allegation of child maltreatment or threatened harm as defined by the statutes. If the report is accepted, or screened-in, as an ap-

propriate concern related to child maltreatment or the risk of child maltreatment, a Child Protective Services (CPS) worker in the agency must initiate an investigation within 24 hours after the receipt of the report. The investigation, or initial assessment, must be completed within 60 days. Reports that suggest a child is in current or imminent danger must receive an immediate response from the agency.

If a report is received by an agency that does not constitute child maltreatment or the risk of child maltreatment, the report is screened-out. In some of these instances, the agency may conduct a service intake to identify and offer support and resources to the family without necessitating a protective service investigation or initial assessment.

In response to reports of alleged maltreatment by individuals outside the family, the CPS role is to support the parents and other appropriate adults in meeting the child's needs. Respect for the privacy, values and rights of each family member underlie all aspects of investigative procedures. (See Appendix B, Child Maltreatment Related Statutes, for statutory definitions of child abuse and neglect in Wisconsin and for categories of persons required to report child abuse and neglect.)

TABLE 1
REPORTER'S RELATIONSHIP TO CHILD, 2003

Reporter Relationship to Alleged Child Victim	Frequency	Percent of All Types

CHILD PROTECTIVE SERVICES INITIAL ASSESSMENT

The primary purpose of the CPS initial assessment is to assure the child's safety and determine whether the child and family are in need of any services to help keep the child safe. The initial assessment process does not result in establishing legal culpability – instead the case is referred to law enforcement and possibly the courts for that purpose. The initial assessment must be conducted in accordance with the Child Protective Service Investigation Standards established by the Wisconsin Department of Health & Family Services in September 1994. These standards recognize that the CPS role must differ in cases of familial and non-familial maltreatment.

In cases of familial maltreatment, the initial assessment includes an interview with and observation of the child, a visit to the home, an interview with any siblings and an interview with the parents. Decisions that must be made include whether the child is safe, whether risk conditions are present, whether maltreatment occurred and whether the family is in need of services to assure the safety and well-being of the child. Many elements enter into the decision-making process: the child's functioning and ability to communicate, characteristics and behaviors of the parents, physical evidence, functioning of the family, and the absence or presence of stressful family circumstances.

Upon completion of an investigation/initial assessment, the agency must determine whether abuse or neglect has occurred or is likely to occur. Case findings for allegations that maltreatment has occurred are either "substantiated" or "unsubstantiated." Case findings for an allegation that abuse or neglect is likely to occur are either "likely to occur" or "not found likely to occur."

For both types of cases, a third finding may be used: "not able to locate sources of information and/or subjects of the report – unsubstantiated." This finding is to be used only when the agency is unable to locate critical family members or others involved in the report, making it impossible to gather the information needed to make a determination.

Beginning in 1996, "substantiated" cases refer only to cases in which CPS staff has determined that, based upon a preponderance of the evidence, abuse or neglect occurred. A preponderance of evidence is a lower standard of evidence than that needed for proof for juvenile or criminal court procedures. Therefore while there may be sufficient information to substantiate an alleged child abuse or neglect case, there may not be sufficient evidence for a children's court finding of Child in Need of Protection or Services (CHIPS) or for criminal court prosecution because of the higher burden of proof required. The agency may determine that maltreatment has occurred or is likely to occur without identifying a particular person that has maltreated or will maltreat a child. Therefore, the agency has the authority to respond to children in need of protection or services even when a specific maltreater cannot be positively identified.

As an agency makes a child abuse and neglect determination for each child, it must also determine whether the child or any member of the child's family is in need of services. The need for services is based more upon identifying children who are unsafe (in imminent danger) and children who are at risk of maltreatment than on the substantiation decision.

Unsubstantiated cases sometimes involve situations where the parents' care for their children is beginning to deteriorate because of life stresses or crises that they are having difficulty handling.

Agencies often are able to assist these families in accessing other community resources and in receiving needed support before the problems result in a threat to child safety.

The significant variance in the county substantiation rate (Table 2) is affected by a number of factors. These may include: the quality of information gathered at phone intake, the intake screening criteria and decision making, the quality of information gathered during the initial assessment, prevailing community standards, and worker and agency judgment. In addition, the frequency with which an agency receives reports alleging the different types of maltreatment allegations may also affect the county substantiation rate. For example, as seen in Figure 3, there is significant variation across the different forms of maltreatment allegations related to substantiated findings. The decrease in the overall substantiation rate, as indicated in Figure 4, is likely to be due to a variety of factors, including federal requirements associated with appeal rights for substantiated maltreaters, which has resulted in a more rigorous application of substantiation decision-making.

Given the important role public agencies have in ensuring child safety, the federal government has placed greater emphasis on the initial assessment function. As part of the Child and Family Services Review (CFSR) process, the federal Children's Bureau has established casework performance indicators related to child safety and national performance standards. Casework performance indicators are reviewed as part of the CFSR and monitored by states as part of their quality improvement efforts. These indicators include timeliness with which CPS initial assessments are initiated and agency response to identifying, understanding and responding to child safety threats.

The national performance standards gauge states on the incidents of repeat maltreatment and of maltreatment of children in out-of-home care. These measures are otherwise known as the

Maltreatment Recurrence Rate and the Maltreatment in Out-of-Home Care (OHC) Rate, respectively. The Maltreatment Recurrence Rate is calculated by identifying all children who were victims of maltreatment or risk of maltreatment in the first 6 months of a year and determining the percentage of children who were victims of another substantiated report within a 6-month period. The Maltreatment in OHC Rate is calculated by identifying all the children who were victims of substantiated maltreatment by a foster parent or group home or residential facility provider during a given period. This number is then divided by the cumulative number of children who were in placement during the same period to establish the maltreatment in out-of-home care rate.

The national performance standards are set at the 75th percentile based on the available data provided by states. At the 75th percentile, the resulting performance expectation for each of these standards is as follows:

- Maltreatment Recurrence 6.1%
- Maltreatment in OHC 0.57%

While the Division has not had annualized data available from WiSACWIS to determine the state's performance on these two national standards, it has used an survey methodology approved by the federal Children's Bureau to estimate the state's results. Based on the calculations resulting from this methodology the state's Maltreatment Recurrence and Maltreatment in OHC Rates for CY 2003 are as follows:

- Maltreatment Recurrence 7.13%
- Maltreatment in OHC 0.31%

Wisconsin did not meet the Maltreatment Recurrence standard as the results exceeded the federal baseline and did meet the Maltreatment in OHC standard as it was below the federal standard.

** The term "report" actually refers to a count of children suspected of being maltreated. A child maltreatment case, which is documented on a child maltreatment form, may include more than one maltreatment victim, and there may be more than one allegation per victim. Reports of mutual sexual activity are included in the totals in this table.

***In this table, the category, "Maltreatment Substantiations" does not include cases with the finding "Abuse-Neglect Found Likely to Occur" or cases where the reporting county is unknown.

**** Includes counts of substantiated allegations only.

FATALITIES

The death of a child is one of the most tragic consequences of abuse or neglect. The role of Child Protective Services in the case of death by abuse or neglect is to assure the safety of any other children present in the family and to assess the family's need for services. Investigations of the death are generally handled by law enforce-

ment agencies. There were 12 substantiated cases of a child having died from maltreatment in CY 2003, as reported by agencies to the Department of Health and Family Services. This compares with 17 children and 12 children who died due to substantiated child maltreatment in CY 2001 and 2002, respectively.

CHARACTERISTICS OF MALTREATERS

When the agency makes a determination that a report of maltreatment is substantiated, the determination does not necessarily include a specific finding as to who maltreated the child. However, in the course of the investigation assessment, the agency worker often makes judgments about who has harmed or is failing to protect a child as part of assessing the child's safety needs. In this report, statistical data collected regarding alleged maltreaters reflects social worker judgments rather than legal determinations that a person has maltreated a child.

Cases of mutual sexual activity are not included in this table as there is no maltreater in such cases. By definition, the sexual activity involved is mutual. These cases include children 15 years old or younger who engage in sexual contact or intercourse as defined by the statutes, but where there is no coercion, exploitation or assaultive behavior involved. There were 1,455 such cases reported in CY 2003.

SERVICES TO FAMILIES

If a child is determined to be unsafe, the CPS agency provides services designed to control the conditions that make the child unsafe. These safety-related services are provided in the family home whenever possible, to maintain and support the family unit. Examples of services used to support child safety in the family home include the following:

- Supervision/Observation
- AODA Services
- Mental Health & Counseling Services
- Hospitalization/Medical care
- Child care & Respite Care Services
- Basic Home Management Services
- Parenting Assistance/Parent-aide
- Basic Needs (transportation, food, clothing, shelter, financial assistance)

Services provided to ensure child safety are intended to immediately control any conditions or behaviors that place a child in danger. Families may also receive treatment services designed to change behavior or impact underlying causes of child maltreatment over the course of the treatment. The use of in-home safety services for families that come to the attention of agencies has greatly enhanced effective early intervention and response to both substantiated and unsubstantiated cases.

If the conditions in the home pose immediate danger to a child and in-home services would be insufficient to assure the safety of the child, the child may be removed from the home and placed temporarily in an alternate out-of-home placement. This may include placement with a relative, foster parent (s) or a child residential facility.

The following tables describe the safety services provided to families during or immediately following completion of the investigation assessment. Table 8 shows the extent that safety services were provided or children were removed from the home. Table 9 shows the extent that cases were opened for CPS services or court intake. The tables do not reflect the following services that may have been provided by local child welfare agencies:

- Treatment services provided to families later during the course of ongoing child welfare intervention with families;
- Additional services and resources to families where a child is considered to be at risk of maltreatment but have not been determined to be unsafe.

TABLE 8
FAMILY SAFETY SERVICES BY TYPE OF MALTREATMENT, 2003

Safety Service Provided	Neglect	Physical	Sexual	Emotional	Likely to Occur
	Number of Reports	Number of Reports	Number of Reports	Number of Reports	Number of Reports

Other agency services	4.0%	6.1%	8.6%	2.8%	5.5%
Case referred to law enforcement ²	5.3%	16.2%	23.1%	5.6%	12.0%
Agency initiated child abuse restraining order	0.0%	0.3%	0.0%	0.0%	0.0%
Not Available/Documented	15.5%	7.1%	0.2%	11.0%	0.0%

* Cases may have more than one disposition. Therefore, the percentages in the column may add up to more than 100%. For example, a case may be referred for a CHIPS (Child in Need of Protection or Services) petition and may be referred to law enforcement. The following tables reflect multiple dispositions in some cases.

¹ The CPS worker may provide brief counseling or referral services to families as part of the investigation assessment. Those services are not reflected in these tables.

² Data regarding referral to law enforcement should not be construed as a lack of law enforcement involvement. Many referrals received by the CPS agencies come from law enforcement. In these situations, the CPS agency often works with the law enforcement agency to respond to the referral, but the case would not be captured statistically as a referral to law enforcement.

APPENDIX A

WHERE TO REPORT

Listed below are the County Departments of Health and Human Services or Social Services that receive and investigate child abuse and neglect reports. Such reports may also be made to law enforcement agencies.

Adams County Department of Health & Social Services

APPENDIX B

CHILD MALTREATMENT RELATED STATUTES

Following are excerpts from the Wisconsin Statutes that create the basis for persons to report suspected child maltreatment and for child protective services agencies to respond. The excerpts are from the updated 1999-2000 Wisconsin Statutes Database. (Note: The excerpts appear exactly as they would appear in the published statutes. Therefore, other portions of the statutes not relevant to child maltreatment are included on some pages.)

Included in the excerpts are sections from Chapter 48, known as the Children's Code, and sections from criminal statutes that are cross-referenced in the Children's Code in order to define child abuse.

Specifically, the following statutory sections are included:

- **s.48.01 Title and legislative purpose.**
- **s.48.02 Definitions.** This includes definitions of child abuse.
- **s.48.13 Jurisdiction over children alleged to be in need of protection or services.** This describes the basis on which the local child protective services agencies (county social/human services departments and the Bureau of Milwaukee Child Welfare) may petition the court to intervene with a family.
- **s.48.981 Abused or neglected children and abused unborn children.** This section defines child neglect, describes the reporting requirements of alleged child maltreatment and describes the child protective services agencies' duties and responsibilities.
- **s.939.22 Words and phrases defined.** This section defines terms that are used in describing certain crimes, some of which are cross-referenced in s.48.02 in order to define child abuse.
- **s.940.225 Sexual assault.** This defines the crime of sexual assault and is cross-referenced under s.48.02(1)(b).
- **s.944.30 Prostitution.** This defines the crime of prostitution and is cross-referenced under s.48.02(1)(d).
- **s.948.02 Sexual assault of a child.** This is the first in a series of crimes from Chapter 948, known as Crimes Against Children that are cross-referenced under s.48.02(1)(b) in order to define child sexual abuse. The following sections are also cross-referenced under s. 48.02(1):
 - **s.948.025 Engaging in repeated acts of sexual assault of the same child.**
 - **s.948.05 Sexual exploitation of a child.**
 - **s.948.055 Causing a child to view or listen to sexual activity.**
 - **s.948.10 Exposing genitals or pubic area.**

The complete Wisconsin Statutes, Chapters 48 and 948 can be reviewed at the following web site location: <http://folio.legis.state.wi.us>
