PROPOSED ORDER OF THE
DEPARTMENT OF HEALTH AND FAMILY SERVICES
AMENDING, REPEALING AND RECREATING, AND CREATING RULES

To amend HFS 196.02; 196.04 (1) (b), (2) (b) 4., Table HFS 196.04, 196.04 (1) (b), 196.05 (2) (a) and (b), 196.07 and HFS 196 Appendix; to repeal and recreate HFS 196.03 (6); and to create HFS 196.03 (1g), (1r) and (4m), 196.04 (1) (d) and (e), and 196.045, relating to restaurants and affecting small businesses.

Analysis Prepared by the Department of Health and Family Services

Statute interpreted

The rules interpret ss. 254.61 to 254.62, 254.64 to 254.72, 254.74 and 254.85, Stats.

Statutory authority

The Department's authority to amend and create these rules is found in ss. 254.71 (6) and 254.74 (1), Stats.

Explanation of agency authority

Section 254.62 (2) directs the Department to promulgate rules that establish a food sanitation manager certification program.

Section 254.71 (6), Stats., gives the Department the authority to promulgate rules that establish a fee for certifying and recertifying food service practices, that specify standards for approval of training courses for recertifying food protection practices, and that establish procedures for issuing certificates of food protection practices, including application submittal and review.

Section 254.74 (1) (a), Stats., authorizes the Department to administer and enforce the rules it promulgates relating to restaurants. Paragraph (d) of that subsection directs the Department to prescribe rules and fix standards, including rules covering the general sanitation and cleanliness of restaurants, the proper handling and storing of food on such premises, the construction and sanitary condition of the premises and equipment to be used, and the location and servicing of equipment.

Related statutes or rules

Sections 93.07 (1) and 97.30 (5), Stats., are related insofar as they authorize the Department of Agriculture, Trade and Consumer Protection to regulate retail food establishments, such as grocery stores. The Department of Agriculture, Trade and Consumer Protection (DATCP) promulgated ch. ATCP 75 under its authority in ss. 93.07 (1) and 97.30 (5), Stats. Both HFS 196 and ATCP 75 contain the same appendix entitled, "Wisconsin Food Code." The Department of Health and Family Services and DATCP are simultaneously promulgating these changes to the Wisconsin Food Code for their respective chapters of administrative code. These proposed changes will positively affect operators of retail food operations and the general public throughout the state by simplifying and clarifying the language of the Code, and will allow health inspectors to spend more time in complex or problematic food establishments, thereby promoting a safer public food supply.

Plain language analysis

This order proposes revising ch. HFS 196, relating to restaurants, including its Appendix, known as the Wisconsin Food Code. The operator of every restaurant in the state must have a permit from the Department of Health and Family Services or an agent local health department before the restaurant may open for business and the restaurant must maintain its permit in order for it to continue operating. The permit signifies that the restaurant complies with the requirements in ch. HFS 196, which is intended to protect public health and safety. The requirements of this chapter are enforced either by the Department or a local health department that the Department has designated as the Department's agent.

The Department's current rules for restaurants were established in 1985 and most recently revised in 2001. Through sections one to six of this order, the Department is proposing to make the following revisions in HFS 196:

- change the term "limited term restaurant" to "pre-packaged restaurant;"
- define the terms "caterer," "contract cook" and "pre-packaged restaurant;"
- modify table HFS 196.04 to eliminate reference to the term "limited;"
- clarify that caterers operating from their permitted restaurants need not obtain additional permits for locations where the caterer serves food; and
- specify operating conditions under which contract cooks are not required to obtain restaurant permits.

Section seven of this order pertains to the Wisconsin Food Code Appendix to HFS 196 and contains the bulk of the proposed changes. The existing Wisconsin Food Code is modeled after the 1999 Food and Drug Administration (FDA) Model Food Code, which contains model requirements for safeguarding public health and ensuring food is unadulterated and honestly presented when offered to the consumer. It represents FDA's best advice for a uniform system of provisions that address the safety and protection of food offered at retail and in food service. Over 44 U.S. states and territories have adopted some version of the FDA Model Food Code and 9 states or territories are in the rulemaking process to adopt the FDA Model Food Code. The Department, which regulates Wisconsin restaurants under ch. HFS 196, and the Department of Agriculture, Trade, and Consumer Protection (DATCP), which licenses and inspects retail food establishments, such as grocery stores under ch. ATCP 75, jointly adopted the Wisconsin Food Code in 2001 for their respective regulatory activities. A common Wisconsin Food Code for restaurants and retail food establishments ensures that the same rules will apply to all types of food establishments, including combinations. Although DATCP and DHFS (or their local agents) coordinate their activities so that a combined grocery store and restaurant is regulated by DATCP or DHFS, but not both, joint adoption and updating of the Wisconsin Food Code is still important for consistent regulation.

The FDA revised its Model Food Code in 2001. The Department proposes to update the Wisconsin Food Code to the 2001 FDA Model Food Code, which reflects the most currently available science and trends in food safety. In addition, the Department proposes to clarify or correct areas of the Wisconsin Food Code that do not reflect current Department policy. Revisions to the Wisconsin Food Code will also reflect modifications from both the Wisconsin Conference on Food Protection and the National Conference on Food Protection, as well as mutually agreed upon suggestions derived from two years of field application by both the Department and DATCP.

The Department is amending its Wisconsin Food Code Appendix to enable readers to see exactly how the Department proposes to change its wording. The proposed changes are highlighted throughout the Appendix to facilitate readers' identification of the proposed changes. In addition, the proposed changes to the Food Code are described below.

- Broad-Based Changes to the Wisconsin Food Code

1. The federal 2001 Model Food Code changed the format of defined terms throughout the Food Code to indicate that the terms are defined. Defined terms are now indicated by small capitalization. New definitions have also been added to the rule.
2. The temperature required to hold hot foods hot was lowered from 140 F ° to 135 F °.
3. References to other Wisconsin state agencies and applicable administrative rules have been clearly identified. After each reference, the agency's contact information is provided in a note.
4. The term "lavatory" has been changed to "handsink."
5. The term "employee" was changed to "food employee" where appropriate.
6. References to *Salmonella typhi* are replaced with *Salmonella Spp* since all *Salmonella* species can cause illness. This also includes changing Latin Binomial names to today's scientific nomenclature, such as *E. coli* 0157:H7 changed to Shiga toxin-producing *E. coli*.
7. References to the Department of Commerce now include the statement "as enforced by the Department of Commerce" or similar wording.

- Specific Changes to the Wisconsin Food Code

1. Section 12-101.11 was modified to clearly indicate when a certified food manager is required.

The Department and DATCP are simultaneously promulgating these changes to the Wisconsin Food Code for their respective chapters of administrative code. These proposed changes will positively affect operators of food service operations and the general public throughout the state by simplifying and clarifying the language of the Code, and will allow health inspectors to spend more time in complex or problematic food establishments, thereby promoting a safer public food supply.

Summary of, and comparison with, existing or proposed federal regulation

The proposed Wisconsin Food Code Appendix to ch. HFS 196 is based on the 2001 edition of federal Model Food Code. The U. S. Food and Drug Administration publishes the *Food Code*, a model that assists food control jurisdictions at all levels of government by providing them with a scientifically sound technical and legal basis for regulating the retail and food service segment of the industry. Local, state, tribal, and federal regulators use the FDA *Food Code* as a model to develop or update their own food safety rules and to be consistent with national food regulatory policy. The Model Food Code provides practical, science-based guidance and manageable, enforceable provisions for mitigating risk factors known to cause foodborne illness. The Code is a reference document for regulatory agencies that oversee food safety in food service establishments, retail food stores, and other food establishments at the retail level. Food safety is a top priority for DHHS and USDA, and they strongly endorse and encourage states' adoption of the Code.

Comparison with rules in adjacent states

Minnesota – Minnesota's rule was originally developed from the 1995 FDA Model Code. Since that time, Minnesota has amended the rule to more closely reflect the 1997 FDA Model Code. The

differences between these proposed rules and those of Minnesota's pertain primarily to two areas. The first is the requirement for the consumer advisory statement, which Minnesota has chosen not to adopt. The consumer advisory statement in the model food code requires that if animal products are served in a raw or undercooked condition that the consumer must be informed of the risks associated with consuming undercooked or raw animal products. The second is that Minnesota has a more stringent requirement relating to standardized food equipment. Wisconsin requires that equipment meet American National Standards Institute (ANSI) standards, but also has formed a variance and equipment committee to review and approve equipment in the state that is not ANSI-approved.

Iowa – Iowa's rule is modeled on the 1997 FDA Model Code. Iowa allows limited bare hand contact with special provisions, which is much like Wisconsin's current and proposed rule.

Michigan – Michigan's rule is adopted from the 1999 FDA Model Code and is largely the same as Wisconsin's current rule.

Illinois – Illinois's rule is adopted from the 1995 FDA Model Code. Like Wisconsin, Illinois is currently revising its rule based on the 2001 FDA Model Code.

Summary of factual data and analytical methodologies

The FDA revised its Model Food Code in 2001 and added a supplement in 2003, which reflects the most currently available science, and trends in food safety. The Department and DATCP reviewed these changes and received comments from local health agencies as well as modifications from both the Wisconsin Conference on Food Protection and the 2002 National Conference on Food Protection. Mutually agreed upon suggestions derived from two years of field application by both the Department and DATCP were also included in the preliminary draft. Once the preliminary draft was prepared, a Food Code Committee was formed which included representation from: DHFS, DATCP, school food service, local health departments, the Wisconsin Restaurant Association, Tavern League, Grocers Association, and the University of Wisconsin Extension – Food Science. The Food Code Committee developed the revisions contained in this proposed rule.

Analysis and supporting documents used to determine effect on small business

The proposed rule changes clarify the existing rule's intent and, in some cases, gives restaurants increased flexibility to utilize current science in food safety.

Anticipated costs incurred by private sector

The proposed changes to ch. HFS 196 will have little or no fiscal impact on Wisconsin restaurants and will not add any business costs.

Effect on small business

The proposed changes to ch. HFS 196 will have a minimal effect on restaurants. The proposed rule changes principally clarify rule intent and allow flexibility for restaurant compliance.

Wisconsin Food Code

PREFACE

Information to Assist the User

The following information explains the organizational format and the meaning of explanatory conventions used in the Wisconsin Food Code, which are intended to make the code easier to use.

Structural Nomenclature

Each chapter of the food code is divided into the following subunits. The system of numbering for a chapter and any of its subunits uses the following format:

Chapter	9
Part	9-1
Subpart	9-101
Section (§)	9-101.11
Paragraph (¶)	9-101.11(A)
Subparagraph	9-101.11(A)(1)

Internal cross-referencing is widely used throughout the code to eliminate the need for restating provisions. For example, fixtures and devices necessary for handwashing are relevant to both the plumbing (Chapter 5) and the facilities (Chapter 6) portions. To alert the reader to relevant information and provide a system by which each violation is recorded under the one most appropriate provision, the Code uses the phrase "...as specified under (followed by a Code cite such as a section or paragraph)." It must be determined within the context of the provision whether the cross reference simply provides information to explain the requirement or whether the observed violation is properly recorded against the provision that is cited after the word "under."

The Wisconsin Food Code presents requirements by principle rather than by subject. For example, equipment requirements are presented under headings such as Materials, Design and Construction, Numbers and Capacities, Location and Installation, and Maintenance and Operation rather than by refrigerators, sinks, and thermometers. In this way provisions need be stated only once rather than repeated for each piece or category of equipment. Where there are special requirements for certain equipment, the requirement is delineated under the appropriate principle (e.g., Design and Construction) and listed separately in the index.

Section Designations Based on Categories of Importance

Requirements contained in the Food Code are identified as being in one of 3 categories of importance: critical; "swing" (i.e., those that may or may not be critical depending on the circumstances); and noncritical. A bold superscripted letter C after a section title indicates that all of the provisions within that section are critical unless otherwise indicated. Any provisions that are "swing" items are followed by a bold, superscripted letter S. Any provisions that are noncritical are followed by a bold, superscripted letter N.

Category of Importance		
Superscripted letter ^C	Critical	Indicates that all of the provisions within that section are critical unless otherwise indicated
Superscripted letter ^S	Swing	The requirement may or may not be critical depending on the circumstances.
Superscripted letter ^N	Noncritical	Noncritical item

Any unmarked provisions within a section that has a superscripted letter C after the section title are critical. All provisions following a section title that is not marked with a superscripted letter C are noncritical.

Font Style

Portions of some sections are written in *Italics*. These provisions are not requirements, but are included in the code to convey relevant information about specific exceptions and alternative means for compliance. Defined words and terms are capitalized (small caps) in the text of the Wisconsin Food Code to alert the reader to the fact that there is a specific meaning assigned to the capitalized words and terms, and that the meaning of a provision is to be interpreted in the defined context. A concerted effort was also made to capitalize all forms and combinations of those defined words and terms that are related to the definition.

Font Style	
<i>Italics Text</i>	Provisions are not requirements, but are provided to convey relevant information about specific exceptions and alternative means for compliance.
CAPITALIZED WORDS and TERMS	Indicates the CAPITALIZED word(s) or term(s) is defined under section 1-201.10(B)
