

**DRAFTER'S NOTE
FROM THE
LEGISLATIVE REFERENCE BUREAU**

LRB-1324/1dn
RCT:jld:nwn

February 9, 2007

Anne Emerson:

This is a draft of the proposal to modify the exemption from the requirement for DNR approval for land disposal of septage. I have become aware that, because of section 990.04 of the statutes, a retroactive effective date for this draft will not protect a person from prosecution under section 281.48 of the statutes, as it was modified last session. I have replaced the retroactive effective date with a nonstatutory provision specifically protecting persons from prosecution if they fit within the exemption as modified in this draft.

Please contact me with any questions.
