## **Assumptions Used in Arriving at Fiscal Estimate**

This bill makes changes to health insurance coverage of nervous and mental disorders, alcoholism, and other drug abuse problems. Self-insured plans of school districts would be affected by several of the bill's provisions.

State Fiscal Effect: None.

Local Fiscal Effect: The department estimates that approximately 10% of the state's 426 school districts are self-insured for health care. These districts could incur costs as a result of the coverage changes proposed under the bill, but the department does not have the information to estimate the fiscal effect on those local self-insured plans. Therefore the local fiscal effect is indeterminate.
