# Fiscal Estimate Narratives UWS 7/27/2007

LRB Number 07-2889/1	Introduction Number	SB-238	Estimate Type	Original				
<b>Description</b> Accessible instructional materials for students with disabilities enrolled in the University of Wisconsin System or the technical college system								

#### **Assumptions Used in Arriving at Fiscal Estimate**

This bill requires that, subject to the availability of funds, the UW System and the WTCS jointly establish a state repository for the purpose of collecting instructional materials. In addition, publishers shall, within 15 working days after receipt of a request from this repository, provide, at no additional cost, instructional material in an electronic format.

The University of Wisconsin System anticipates that there will be initial startup costs, periodic equipment replacement costs, as well as annual ongoing costs related to the establishment of a repository of instructional materials. The costs proposed here were developed in conjunction with the Wisconsin Technical College System. It is assumed that the costs proposed will be shared between these two systems. However, the final nature of this sharing is yet to be negotiated.

Institution staff who work with UW and WTCS students with learning and other disabilities note that in recent years, annually approximately 10,000 students have identified themselves as having learning, vision, and other print impairments. These staff further indicate that a repository to handle the requests by these students in both educational systems would require 2 full-time administrative staff to coordinate between the two systems and one part-time assistant. In addition, support equipment (computers, phone and T lines, and associated electronic media) is also required. These costs are indicated on the attached worksheet.

#### **Long-Range Fiscal Implications**

Attention is drawn to the fact that there will be ongoing equipment replacement costs and costs for new types of equipment which might become necessary as a result of technological advances, should this repository be established. These costs cannot be estimated at this time.
