Assumptions Used in Arriving at Fiscal Estimate

SB 272 eliminates three fees collected by the agency. Based on FY 2007 data, the elimination of the fees for duplicate licenses, letters of clearance, and letters of certification will result in a reduction of \$16,260 of revenue per year.

SB 272 also makes changes to the license suspension and revocation process for agents who become delinquent in completing required continuing education or paying statutory fees. As a result of these changes agents will have an extended (12 months) opportunity to correct the deficiencies and avoid repeating prelicensing education requirements in current law. As a result, reinstatement fees that would have been paid to OCI's vendor as a part of the prelicensing testing will now be remitted directly to OCI as a part of the reinstatement application. The expected number of agents affected is estimated to be on average 25 agents per month. The expected revenue reinstatement applications at a single line of insurance application fee of \$50.00 would result in an increase in revenues of \$15,000 annually. It is possible that some of the agents applying for reinstatement may have more than one line of authority, in which case, the amount of increased revenue would be higher. It is not possible to estimate the number of these multi-line agents however.

FY 2007 Data:

Letters of Certification \$(12,730)
Letters of Clearance \$ (2,300)
Duplicate Licenses \$ (1,260)
Increase reinstatement fees \$ 15,000
Net change in revenues \$(1,260)

The bill does not require agents to be fingerprinted, but merely gives the Commissioner the authority to promulgate a rule related to fingerprinting at some future time if the Commissioner determines that fingerprinting of agents has become necessary to ensure statutory compliance and adequate consumer protection. Therefore, there will be no fiscal effect resulting from this provision.

Likewise, changes made to license suspension, revocation and reinstatement statutes will not result in any increased fiscal effect because they make changes to existing statutory processes.
