

**DRAFTER'S NOTE
FROM THE
LEGISLATIVE REFERENCE BUREAU**

LRBa0430/1dn
MDK:wlj:rs

April 24, 2007

Rep. Pocan:

Under current law, a “cable operator” is defined, in part, as a person that provides one-way transmission of video programming. This amendment revises the definition to include both the one-way and two-way transmission of video programming. Therefore, the definition will include entities such as AT&T, who have argued that they provide two-way, and not one-way, transmission, and such entities will be subject to the regulation by municipalities.
