Fiscal Estimate Narratives

DOR 2/14/2007

LRB Number	07-1385/1	Introduction Number	AB-0047	Estimate Type	Original
Description Creating a nonrefundable individual income tax credit for certain amounts relating to health savings accounts that may be deducted from, or are exempt from, federal income taxes					

Assumptions Used in Arriving at Fiscal Estimate

Under current federal law, individuals are allowed a deduction from federal gross income for amounts contributed during the taxable year to a health savings account (HSA). Earnings on the accounts are also tax-deductible, and account funds may be withdrawn tax-free when used to pay for routine and preventive medical care. Wisconsin has not adopted the federal treatment of HSAs.

This bill would allow a nonrefundable state income tax credit equal to 6.5% of the allowable amount that individuals claim as a federal tax deduction for a contribution to an HSA, 6.5% of the federal tax-exempt earnings relating to an HSA, or both. The amount of the credit allowed for part-year residents and nonresidents is calculated by multiplying the amount of the credit for which the claimant is eligible by the ratio of the individual's Wisconsin adjusted gross income to federal adjusted gross income.

The amount of the federal deduction taken by Wisconsin tax filers is calculated based on the Joint Committee on Taxation's estimate of the federal fiscal impact of the federal treatment of HSAs and Department of Revenue data. It is estimated that the revenue loss associated with this bill for fiscal year 2008 is \$8.4 million. The estimated loss increases to \$13.1 million in fiscal year 2009 and \$17.6 million in fiscal year 2010.

Long-Range Fiscal Implications
