Analysis by the Legislative Reference Bureau

Confidentiality of health care services reviews

Current law provides that a person who participates in a review or evaluation
of services provided by a health care provider or facility, or of charges for such
services, (a review) generally may not disclose information acquired in connection
with the review. Further, the records that a reviewer or evaluator creates of
investigations, inquiries, proceedings, and conclusions conducted for the review (review records) generally may not be released. Under current law, review records may not be used in a civil action for personal injuries against the health care provider or health care facility.

Current law contains several exceptions to confidentiality of review records and information acquired in connection with a review, which require disclosure of such records and information under the following circumstances: to a health care provider or facility whose services are reviewed, or to any person with the consent of that provider or facility; to the person who requested the review, for use only for the purpose of improving the quality of health care, avoiding improper utilization of health care services, and determining reasonable charges for services; to a court upon issuance of a subpoena in a criminal action; to an examining or licensing board or agency, when the organization or evaluator conducting the review determines that such action is advisable; and in a report in statistical format.

This bill makes the following changes to confidentiality provisions for health care service reviews:

1. The bill repeals the exception to confidentiality that requires release of review records and information acquired in connection with a review upon issuance of a subpoena in a criminal action.
2. The bill provides that review records may not be used in any civil or criminal action against any health care provider or health care facility.
3. The bill provides that a person who participates in a review may not disclose any incident report that is made to notify a reviewer of an incident, practice, or other situation that becomes the subject of a review. Further the bill prohibits using such an incident report in any civil or criminal action against a health care provider or facility.
4. The bill specifies that the confidentiality provisions related to review records apply regardless of whether the review is conducted by representatives from one one or more organizations.
5. The bill provides that the confidentially provisions for review records apply only if the review for which the records were created was conducted for one of the following purposes: to help improve the quality of health care, to avoid improper utilization of the services of health care providers or facilities, or to determine reasonable charges for such services.
6. Instead of requiring that review records and information acquired in connection with a review be disclosed in statistical form, the bill allows that such information and review records may be disclosed in statistical form.

Use of health care reports or employee statements

This bill prohibits the use as evidence in a civil or criminal action of any health care provider reports that are required by the department of regulation and licensing or by the division within the department of health and family services that conducts health care provider quality assurance reviews. The bill also prohibits the use as evidence in a civil or criminal action of any statements of, or records of interviews with, employees of a health care provider related to the regulation of a health care provider and obtained by the department of regulation and licensing or by the
division within the department of health and family services that conducts health care provider quality assurance reviews. The bill makes an exception from these prohibitions for the use of the records, statements, or interviews in an administrative proceeding conducted by the department of regulation and licensing or by the division within the department of health and family services that conducts health care provider quality assurance reviews.

**Crimes**

Under current law, a person who causes the death of, or bodily harm to, an individual by negligent operation or handling of a dangerous weapon, explosives, or fire is guilty of a crime. A dangerous weapon includes any device or instrumentality, which in the manner it is used or intended to be used, is calculated or likely to produce death or great bodily harm. The bill provides that a health care provider is not guilty of the crimes of causing the death of, or bodily harm to, an individual by negligent operation or handling of a dangerous weapon, explosives, or fire, if the health care provider is acting within the scope of his or her practice or employment.

Also under current law, a person who intentionally, recklessly, or negligently abuses an individual who is age 60 or older, or an individual who has a physical or mental condition that substantially impairs his or her ability to care for his or her needs, and who has experienced, is currently experiencing, or is at risk of experiencing abuse, neglect, self-neglect, or financial exploitation (individual at risk), is guilty of a crime. This bill eliminates criminal liability for negligent abuse of an individual at risk.

Finally, under current law, a person who is in charge of or employed by a residential care facility, an inpatient health care facility, a treatment facility, or a home health agency, who intentionally, recklessly, or negligently abuses or neglects a patient or resident is guilty of a crime. This bill eliminates criminal liability for negligent abuse or neglect of a patient or resident.
