external defibrillator, extending the time limit for emergency rule procedures,
providing an exemption from emergency rule procedures, and requiring the
exercise of rule-making authority.

Analysis by the Legislative Reference Bureau
Under current statutes and administrative rules, the following persons are
required to successfully complete instruction in cardiopulmonary resuscitation:
emergency medical technicians; first responders; instructors of emergency medical
technicians or first responders; hospital medical and nursing personnel who provide
emergency services; day care center, group home, and shelter care facility staff who
provide care for children; chiropractors; dental hygienists; dentists; licensed
midwives; lifeguards; health services staff at camps; fitness center employees;
athletic trainers; specialized motor vehicle drivers and attendants; and massage
therapists and bodyworkers. Beginning May 1, 2007, licensed midwives will be
required to be currently certified in cardiopulmonary resuscitation.

This bill requires these persons to successfully complete a course on the use of
automated external defibrillators. The bill requires chiropractors, dental hygienists,
dentists, licensed midwives, athletic trainers, and massage therapists and
bodyworkers to demonstrate current proficiency in the use of an automated external
defibrillator in order to obtain licensure or certification and, with the exception of
massage therapists and bodyworkers, the renewal of a license or certificate. This bill
also requires the Department of Health and Family Services (DHFS) to approve
individuals, organizations, and institutions of higher education to provide the
course.

Current administrative rules require a residential care center for children and
youth operated by a child welfare agency to have in each building housing residents
of the residential care center for children and youth when those residents are present
at least one staff member who has successfully completed instruction in
cardiopulmonary resuscitation and require a shelter care facility to have readily
available on the premises of the shelter care facility a staff member or other person
who has successfully completed such instruction. This bill requires DHFS to
promulgate administrative rules requiring a residential care center for children and
youth to have in each building housing residents when residents are present at least
one staff member who has successfully completed a course in the use of automated
defibrillators and requiring shelter care facilities to have readily available
on the premises a staff member or other person who has successfully completed such
a course.

For further information see the state and local fiscal estimate, which will be
printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do
enact as follows:

SECTION 1. 46.03 (38) of the statutes is created to read:

46.03 (38) AUTOMATIC EXTERNAL DEFIBRILLATOR INSTRUCTION. Approve
