Analysis by the Legislative Reference Bureau

Regulation of electrical wiring

Under current law, the Department of Commerce (Commerce) promulgates rules for electric construction in public buildings and places of employment and in places where farming is conducted. This bill expands Commerce’s duty in this regard to promulgate a state wiring code that establishes standards for installing, repairing, and maintaining electrical wiring, regardless of what type of building is involved. The authority of a city, village, town, or county (municipality) to enact a local electrical code is also expanded in the same manner. The bill defines “electrical wiring” to be equipment and wiring for the production and control of electrical energy; “electrical wiring” does not include the equipment and wiring used by public utilities, electric cooperatives, or operators of wholesale merchant plants for the generation, transmission, and distribution of electricity to their customers or members. (A “wholesale merchant plant” is a plant that is generally not owned by a public utility and that provides service to wholesale customers.)

Regulation of electricians and electrical and other contractors

Under current law, Commerce administers a certification program for master electricians, electrical contractors, journeymen electricians, and beginning electricians. The program has a uniform examination for certification of master electricians and specifies that only master electricians and persons who employ at least one master electrician may be certified as electrical contractors. The program also establishes requirements for the certification of journeymen electricians and beginning electricians. Also under current law, a municipality may license an electrical contractor if the contractor has at least one master electrician as an employee. However, current law does not specifically require that a person be licensed or certified by Commerce or by a municipality to work as an electrician or electrical contractor.

Under this bill, a municipality may no longer license a contractor. Also, the bill specifically prohibits municipalities from registering or licensing electricians. Instead, under the bill, no person may work as an electrician or as an electrical contractor unless the person is licensed by or registered with Commerce. Commerce must promulgate rules for the licensing of electrical contractors and for the licensing and examination of all types of electricians, including journeymen and master electricians, but excluding beginning electricians. Under the bill, beginning electricians must register but do not need to pass an examination. The bill also requires that no person may do electrical work unless a master electrician is at all times responsible for the work.

The bill specifies several persons who are exempt from licensing or registration, including persons who perform certain types of electrical work on their own residences or in their own facilities, persons who perform electrical work on
SENATE BILL 167

Elevators, escalators, and alarm systems, and persons who perform equipment installation that is not primarily electrical in nature. Also exempt are employees and subcontractors of electricity providers, persons who work on lighting or signals for public thoroughfares or airports, and persons who work on the utility side of substations and other distribution facilities owned or operated by customers or members of electricity providers.

In addition to requiring Commerce to promulgate rules for the regulation of all electricians, the bill imposes specific requirements as to the amount of experience necessary to be licensed as a residential or nonresidential journeyman electrician.

Finally, the bill repeals a provision authorizing the licensing and regulation of heating and air conditioning contractors in any county with a population of 500,000 or more (currently only Milwaukee County).

**Inspections of electrical wiring**

Under current law, Commerce promulgates rules for inspections of electrical construction in public buildings, places of employment, and places where farming is conducted. This bill expands the scope of this rule-making authority to cover all electrical wiring. Under current law, a municipality may enact an ordinance regulating the inspection of electrical construction in public buildings and places of employment if the ordinance meets the minimum state requirements. Under current law, Commerce must contract with a municipality for inspections of electrical construction for compliance with state law if the municipality has enacted such an ordinance and if the municipality requests Commerce to do so. Commerce must also provide such inspection in a municipality that has not enacted such an ordinance. This bill eliminates these provisions concerning contracting between Commerce and a municipality. The bill also expands the scope of municipal inspection authority to cover all electrical wiring.

Commerce may, at the request of the owner or tenant, inspect the exterior and interior wiring of a public building or place of employment to determine compliance with state law. Current law also requires the company furnishing electric current to obtain proof of compliance with state law before furnishing the current. This bill eliminates these provisions.

The bill requires Commerce to promulgate rules establishing criteria for certifying all electrical inspectors of electrical wiring. Under current law, Commerce is required to promulgate certification criteria only for inspectors of public buildings and places of employment. The bill also requires Commerce to promulgate rules establishing standards and a process for the inspection of electrical wiring, including the inspection of electrical wiring for which a municipality does not provide inspection. The bill specifically prohibits municipalities from certifying electrical inspectors and requires that all inspections of electrical wiring be conducted by inspectors certified by Commerce.
For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:

SECTION 1. 59.79 (4) of the statutes is repealed.
