Analysis by the Legislative Reference Bureau

This bill requires health care providers, as defined and limited in the bill, to provide health care consumers with certain charge or payment rate information, upon request by and at no cost to the consumers; the information must be updated annually and may not be construed as a legally binding estimate. Under the bill, a health care provider must, within a reasonable period of time after the request, provide the consumer with the usual and customary charges, assuming no complications, for inpatient or outpatient health care services, diagnostic tests, or procedures provided by the health care provider that the consumer specifies. In addition, upon request, the health care provider must immediately, on site, provide the consumer with all of the following information, as a single document:

1. The usual and customary charge, assuming no medical complications, for each of the 50 health care services, diagnostic tests, or procedures, relevant to the treatment of particular presenting conditions, that the health care provider most frequently performs. This information must be classified in the form of diagnosis-related groups, if provided by a hospital; in the form of presenting conditions, if provided by a physician; and in a grouping form similar to that for a

SENATE BILL 337

hospital or a physician, if provided by a health care provider that is not a hospital or a physician.

2. If the health care provider is certified as a provider of Medical Assistance (MA), the MA payment rates, as specified on the Web site of the Department of Health and Family Services, for the provider's 50 most frequently performed health care services, diagnostic tests, or procedures.

3. The average allowable payment from private, third party payers for the provider's 50 most frequently performed health care services, diagnostic tests, or procedures.

4. The average of the charges and payment rates for each health care service, diagnostic test, or procedure specified in 1. to 3., above.

Under the bill, a self-insured health plan of the state or a county, city, village, town, or school district, or an insurer that provides coverage under a health insurance policy, including defined network plans and sickness care plans operated by cooperative associations, must provide to an insured under the health insurance policy or an enrollee under the self-insured health plan a good faith estimate of the reimbursement that the insurer or self-insured health plan would expect to pay a specified provider for a specified health care service. In addition, the insurer or self-insured health plan must provide to an insured or enrollee a good faith estimate of the insured's or enrollee's total out-of-pocket cost for the specified service provided by the specified provider. The information must be provided only if the insured or enrollee requests it, and it must be provided at no charge to the insured or enrollee. Any good faith estimate provided is not a legally binding estimate.

The bill also requires health care providers to display prominently statements informing health care consumers of the consumers' right to request charge or payment rate information for health care services, diagnostic tests, or procedures from the health care providers or from their insurers.

For further information see the *state and local* fiscal estimate, which will be printed as an appendix to this bill.
