For further information see the state and local fiscal estimate, which will be printed as an appendix to this bill.

The people of the state of Wisconsin, represented in senate and assembly, do enact as follows:
SENATE BILL 365

JOINT LEGISLATIVE COUNCIL PREFATORY NOTE: This bill, developed by the Joint Legislative Council’s Special Committee on Review of State School Aid Formula, makes a series of changes to the school finance system in the state.

The bill includes provisions relating to school transportation, declining enrollment districts, low-spending districts, and a revenue limit flexibility option. The bill reflects the statutory changes made in 2007 Wisconsin Act 20, the biennial budget act, after the committee adopted its recommendations.

Transportation
The bill requires each school board, by February 1, 2009, to report to the Department of Public Instruction (DPI) the miles driven in the 2007–08 fiscal year to provide transportation to and from school for public and private pupils. Excluded from this calculation are transportation to and from extracurricular activities, the transportation of children with disabilities, shuttle services, and field trips. The bill directs DPI to submit a report summarizing the data to the Legislature by May 1, 2009.

Current law authorizes DPI to reduce payments under the school transportation appropriation that funds a portion of local transportation costs when that appropriation is insufficient to cover eligible costs filed by school districts. The bill directs DPI to fully expend the appropriation set aside for such transportation, by increasing payments to districts on a prorated basis. [See Sections 2, 3, 4, 15 (1), and 16 (3) of the bill.]

Declining Enrollment
The bill extends the enrollment adjustment aid period for school districts to three years. Under 2007 Act 20, in the first year of an enrollment decline, a school district would receive 100% of the allowable revenues that the decline would have generated. The bill continues the 100% in the first year of the decline, but in the year after the decline, the district would receive an adjustment equal to 75% of the first-year adjustment. In the third year after the decline year, the district would receive an adjustment equal to 50% of the first year adjustment. [Sections 9, 10, 11, and 16 (1).]

Low Spending Districts
The bill increases the low revenue ceiling for revenue limits by $400 per pupil in each of the next two years. Thus, the 2008–09 low revenue ceiling would be increased to $9,100 from the current $8,700 per pupil. Subsequently, the ceiling in the 2009–10 school year would be increased to $9,500. [Section 5.]

Revenue Limit Flexibility Option
The bill provides school districts with revenue limit flexibility based on a percentage of statewide average allowable revenue per pupil.

Current revenue limits restrict the annual increase in a school district’s per pupil revenue derived from general school aids, computer aid, and property taxes. Actual general aids, computer aid, and property tax revenue received in the prior year are used to establish the base year amount in order to compute the allowable revenue increase of the current school year. A per pupil revenue limit increase, which is adjusted annually for inflation, is added to the base revenue per pupil for the current school year. A school district may exceed this revenue limit by receiving voter approval at a referendum.

The bill allows a school board, by a 2/3 vote of its members, to increase its revenue limit, on a nonrecurring basis, by an amount equal to 1% of the statewide average allowable revenue per pupil in the previous school year, multiplied by the district’s current three-year rolling average pupil count. Under the bill, the 1% would not be included in shared cost and would not be included in the determination of partial school revenues for purposes of calculating state aid. The additional costs would be funded from local property taxes and would not be supported by state aid.

Districts would be required to levy the maximum amount allowed under current revenue caps and would not be allowed to put the additional 1% into a fund balance account or maintain the excess revenue in the balance of any fund beyond June 30 of the school year in which the resolution was adopted. As a nonrecurring cost, the additional

spending would not be part of the school district base budget; therefore, for a school board
to exceed its revenue cap in any subsequent years, it would need to authorize the
additional 1% each year by a 2/3 vote of the members. [Sections 1, 6, 7, 8, 12, 13, 14, and
16 (2).]

The bill makes other technical changes relating to the placement and
cross-references in the statutes necessary to implement the proposed changes.
