AN ACT to create 71.31 of the statutes; relating to: tax disclosure statements.

Analysis by the Legislative Reference Bureau

This bill requires all publicly traded corporations doing business in this state, including those traded on foreign stock exchanges, and all corporations doing business in this state for which 50 percent or more of the voting stock is owned directly or indirectly by a publicly traded corporation to submit annual statements to the Department of Revenue (DOR). The bill requires that such statements contain certain information regarding the corporation, including name and commercial domicile, total gross income, total business income apportioned to this state, and total deductions for management services, fees, rents, royalties, interest, and license fees paid to an affiliated entity. If the corporation does not file a state income tax return for the year related to the statement, the corporation must also explain in its statement why it is not required to file a state income tax return and indicate the total gross income from sales to purchasers in this state for the year related to the statement. Under the bill, the information contained in the statement is considered a public record beginning on the first day of the third calendar year following the calendar year in which the taxable year related to the statement ends. After the information becomes available to the public, DOR shall make the information available in paper form and as a searchable database accessible on the Internet.
