1	Madison	Comment	WI Fish and Bait Dealer Association	Fish Health	ATCP 10.645 appears to overstep DA authority, it is also unclear who it applies to and when testing is required. ATCP 10.645 create some way for a fish operations separated and allow for the handling of susceptible species with continued retesting of the whole farm.	SPS and (b)3	
2	Madison	Comment	WI DNR	Fish Health	The proposed rule should be revised for stocking and wild stock transfers under limited conditions designed to avoid the spread of VHS or other fish diseases. ATCP 10.645 falls short in establishing comprehensive fish health standards for wild bait in Wisconsin, particularly FHC requirements for APHIS non-listed fish species distributed as bait. The Department recommends the establishment of comprehensive fish health standards for the distribution and sale of all species of bait fish harvested under the provisions of s. 29.09, Stats. For purposes of interpreting and reviewing Fish Health Certificates during the issuance of WDNR stocking permits under Ch. 29, Stats., it appears unclear what is covered by an FHC (i.e. lots, age groups, premises registration, or farm registration).	allow fry to remain in spread of	
3	Stevens Point	Comment	Gollon brother Wholesale Live Bait, Inc.	Fish Health	30 DAY FHC: concerned that MN fish are deemed to be wild and can only get a 30 day fish health certificate. While SD is deemed and qualifies for the annual health certificate. A 30 day fish health certificate with a 30 day approval window by DATCP is to short TESTING: Working on what needs to be tested is confusing.		
4		Opposed	Jim and Eileen Michalski	Fish Health	Small fish farmers will not be able to afford these testing costs and they will be regulated out of business		
5	Menomonee	Opposed	Herby Radmann - The Bullfrog's Eat My Fish Farm	Fish Health	Rules do not have appropriate regard for small farms. Health certificate for fish movement should be based on risks.		

1	Madison	Support	Peter Giacomini - AgSource Cooperative Services	John's	The proposed rule change is a simple, no cost way to take advantage of existing infrastructure that will advance control of John's disease. We encourage support.
2		Comment	DATCP	John's	Premises ID should be a requirement for participation in program in order to get reimbursed or certified or to vaccinate
3	Madison	Support	Wisconsin Farm Bureau Federation - Jeff Lyon, Director, Governmental Relations	John's, premises	Supports ATCP 10.15(1)(d) John's disease milk sample tests. Also supports rule change to make premises renewal every 3 yrs. Supports the decision to make premises registration free (opposes fees on producers to pay for premises registration). We do not have access to the internet, or want to be a part of it. DATCP does not need any more control power. This (premises) is an invasion of privacy. DATCP is catering to the big mega farms by letting them off the hook on some rules regulations that the small family farms have to comply with. This is unacceptable  Extending the Brucellosis testing requirements for certified herds from 2 to 3 years is a huge step in making the Brucellosis rules consistent with the TB rules. Would like to see the Brucellosis requirement to become a certified herd be reduced from 3 whole herd tests to 2 whole herd tests.  Changing the TB testing requirements for movement from 360 days to 90 days prior to movement is unacceptable. 			<p>out of business. To make this rule better it is recommended that DATCP recognize samples taken at hunting preserve as valid for the breeder location that sold to the hunting preserve. Or allow the option for the farmer to 'replace' the untestable animal be putting down another animal and having it tested.</p> <p>Under current rule 30' separation is acceptable for 'medical separation. We see no reason not to continue with this requirement as an approved means to separate the two herds.</p> <p>When we refer to decomposing samples, it would be helpful to have the lymph node declared the primary specimen instead of the obex.</p> <p>We suggest that all samples we send in that are not testable by IHC testing be automatically tested using the Western Blot. Additional expense involved for the Western Blot test would be passed on to the farm.</p>
