12 an appropriation.

Analysis by the Legislative Reference Bureau

This bill: 1) makes changes to the authority of the Public Service Commission (PSC) over telecommunications utilities; 2) imposes limits on charges for access services by telecommunications utilities; 3) specifies the PSC's authority over interconnected voice over Internet protocol (VOIP) service; 4) makes changes to the PSC's authority for ensuring universal access to telecommunications service; and 5) requires certain telecommunications providers to make electronic call records available to other telecommunications providers.

PSC REGULATION OF TELECOMMUNICATIONS UTILITIES

Under current law, a telecommunications provider that provides basic local exchange service is defined to be a telecommunications utility. The PSC's authority over a telecommunications utility depends on whether the PSC has certified the telecommunications utility as a telecommunications utility (TU) or an alternative telecommunications utility (ATU). In general, the PSC has certified as TUs those telecommunications providers that are incumbent local exchange carriers (ILECs) under federal law, which are telecommunications providers that resulted from the breakup of the Bell System pursuant to a federal antitrust action. In general, the PSC has certified as ATUs those telecommunications providers that are competitive local exchange carriers (CLECs) under federal law, which are telecommunications providers that compete with ILECs to provide basic local exchange service.

ASSEMBLY BILL 696

Under current law, TUs are subject to varying degrees of regulation by the PSC, depending on certain factors, such as whether the TU has elected price regulation, under which the PSC regulates the rates charged by a TU, but not the TU's rate of return. The degree of PSC regulation also depends on whether a TU is a cooperative association, or whether the TU is a "small TU," which is a TU that had fewer than 50,000 access lines in this state on January 1, 1984. With certain exceptions, current law exempts an ATU from PSC regulation, except that, if certain conditions are satisfied, the PSC may impose on an ATU a requirement that otherwise applies to a TU or other public utility.

With respect to ATUs, the bill limits the requirements that the PSC may impose. Under the bill, the PSC may impose requirements on an ATU that relate only to the following: 1) submission of stockholder and other business management information; 2) PSC examination of accounting and other business records; 3) use of and connection to transmission equipment and property by other telecommunications providers; 4) confidential treatment of records by the PSC; 5) rates and costs of unbundled network elements; 6) interconnection agreements and other interconnection requirements; 7) telephone caller identification, pay-per-call, and toll-free services; 8) PSC privacy rules; 9) universal service and contributions to the state universal service fund; 10) impairment of speed, quality or efficiency of services, products, or facilities offered to consumers; 11) access to telecommunications emergency services; 12) compliance with price lists, contracts, and PSC rules and orders regarding providing consumers with service, products, or facilities; 13) discrimination in favor of affiliates and other entities; 14) restrictions on resale or sharing certain services, products, and facilities; 15) violations of rules of the Department of Agriculture, Trade and Consumer Protection regarding advertising and sales and collection practices; 16) transfer of local exchange customers to other telecommunications providers; 17) late payment charges; 18) PSC questionnaires and other information requests; 19) PSC hearings on consumer complaints; 20) changes to PSC orders and reopening PSC cases; 21) PSC-required tests; 22) conditional, emergency, and supplemental PSC orders; 23) timing of effect of PSC orders; 24) court review of PSC orders; 25) injunction procedures; 26) enforcement duties of the PSC, the attorney general, and district attorneys and related court venues; 27) penalties related to information and record requests; 28) forfeitures; 29) abandonment or discontinuance of lines, services, and rights-of-way; 30) assessments for reimbursement of PSC expenses; 31) assessments for telephone relay service; and 32) issuance of securities. The bill also provides that if the PSC imposes any of the foregoing requirements on an ATU, the PSC must impose the same requirement at the same level of regulation on all other ATUs, as well as all other TUs.

The bill also provides that certification as an ATU is on a statewide basis and that any ATU certification issued by the PSC before the bill's effective date is considered amended to be a statewide certification. However, the foregoing does not apply to an ATU owned or operated by a city, village, or town. In addition, with certain exceptions, the bill allows the PSC to deny certification as an ATU if the PSC finds that the applicant for certification does not have the financial, managerial, or

ASSEMBLY BILL 696

technical capabilities to provide service or comply with requirements imposed by the PSC.

With respect to TUs, the bill exempts TUs from requirements relating to all of the following: 1) PSC classification of public utility service; 2) PSC valuation of utility property; 3) accounting requirements, including depreciation rates and new construction accounting; 4) reporting of expenses, profit, and other items; 5) PSC reports of utility property values and other financial data; 6) filing of rates and PSC approval of rates (except for access service charges, as described below); 7) PSC investigations of rates and services; 8) construction, installation, or operation of new facilities; 9) PSC approval of certain contracts; 10) certain municipal authority to regulate public utilities; and 11) dissolution and reorganization. The bill makes changes to current law to ensure that small TUs, and TUs that are cooperatives, are subject to the foregoing exemptions. In addition, the bill repeals the requirements that apply to TUs under current law that apply to the following: 1) offering new telecommunications services, or services jointly offered with other TUs; 2) classification of TU service; 3) promotional rates; and 4) consolidations and mergers. Also, the bill repeals price regulation of TUs and terminates any requirements imposed by the PSC on price-regulated TUs.

The bill also allows a TU to terminate its certification as a TU and require the PSC to certify the TU as an ATU. The PSC must issue an order certifying a TU as an ATU no later than 30 days after receiving notice from the TU to terminate its TU certification. The order must also terminate all regulatory requirements related to the TU certification. Upon certification as an ATU, the formerly certified TU is subject to the same requirements as an ATU, as described above. In addition, the bill allows a TU to retain its certification as a TU but require the PSC to regulate the TU in the same manner as an ATU. The PSC must issue an order that accomplishes this result no later than 30 days after receiving notice from the TU.

ACCESS SERVICE CHARGES

The bill creates requirements that apply to access charges, which the bill defines as dedicated access charges and switched access charges. “Dedicated access charges” is defined as the rates and rate elements that a local exchange carrier charges a telecommunications provider for wholesale access service to a local exchange network for the purpose of enabling the telecommunications provider to originate or terminate telecommunications service within the local exchange. “Switched access charges” is defined as the rate and rate elements that a local exchange carrier charges a telecommunications provider for the provision of switched access to a local exchange network for the purpose of enabling the telecommunications provider to originate or terminate telecommunications service within the local exchange.

The bill prohibits an ILEC from increasing its intrastate access charges so that they exceed the ILEC’s interstate access charges allowed under federal law. Also, no later than six months after the bill’s effective date, an ILEC must make any reductions in its intrastate access charges that are necessary to ensure that they do not exceed the ILEC’s interstate access charges allowed under federal law. The bill creates requirements for an ILEC to recover from the state universal service fund

ASSEMBLY BILL 696

certain portions of the reduction in revenues that result from making the required reductions in intrastate access rates. During the first year following the reductions, an ILEC must recover 95 percent of its reduction in revenues each month; during the second year following the reductions, an ILEC must recover 85 percent of its reduction in revenues each month; and, except as described below, during the third year following the reductions and each year thereafter, an ILEC must recover 75 percent of its reduction in revenues each month. The exception applies if an ILEC fails to provide access to broadband service to at least 85 percent of its customers in any month during the sixth year following the reductions and in any year thereafter. If the exception applies, an ILEC must recover 50 percent of its reduction in revenues in the relevant month, rather than 75 percent as required above. The bill defines “broadband service” for purposes of the exception as a service that provides access to the Internet that is capable of transmitting data packets or Internet signals at upstream or downstream average minimum speeds of 200 kilobits per second, except that the PSC may promulgate rules specifying greater upstream or downstream average minimum speeds if such speeds are consistent with any definition established by the Federal Communications Commission (FCC).

The bill requires the PSC to make disbursements from the state universal service fund for ILECs to make the recoveries described above. The bill also includes requirements for determining the reductions in revenues. In addition, the bill allows an ILEC to increase its monthly non-access service rates in order to recover reductions in revenues that are not recovered from the state universal service fund as described above.

The bill also creates requirements for telecommunications providers that are not ILECs. Under the bill, such a telecommunications provider’s intrastate access charges for a local exchange may not exceed the intrastate access charges of the ILEC that provides telecommunications service in the local exchange. However, if the telecommunications provider’s intrastate access charges on the bill’s effective date exceed the ILEC’s intrastate access charges that were in effect on October 1, 2009, the bill requires the telecommunications provider to reduce its intrastate access charges over a five-year period as follows: 1) no later than two months after the bill’s effective date, the telecommunications provider must reduce its intrastate access charges by 20 percent of the difference between its charges in effect on the effective date of the bill and the ILEC’s charges in effect on October 1, 2009; 2) no later than 24 months after the bill’s effective date, the telecommunications provider must reduce its charges by 40 percent of such difference; 3) no later than 36 months after the bill’s effective date, the telecommunications provider must reduce its charges by 60 percent of such difference; 4) no later than 48 months after the bill’s effective date, the telecommunications provider must reduce its charges by 80 percent of the difference; and 5) no later than 60 months after the bill’s effective date, the telecommunications provider must reduce its charges by 100 percent of the difference. In addition, at the end of the five-year period, the telecommunications provider’s intrastate access charges may not exceed the ILEC’s intrastate access charges. As a result, the telecommunications provider may have to make additional

ASSEMBLY BILL 696

reductions to ensure that the telecommunications provider complies with the prohibition.

INTERCONNECTED VOIP SERVICE

With two exceptions, the bill provides that interconnected VOIP service is exempt from PSC regulation. The bill provides that interconnected VOIP has the same meaning as under federal law, which is a service requiring a broadband connection and Internet protocol-compatible customer premises equipment that allows the user to engage in real-time, two-way communication over the public switched telephone network. The first exception to the exemption is that a telecommunications provider that provides interconnected VOIP service must make contributions to the state universal service fund based on its revenues from providing the service. The bill specifies the methods for calculating the revenues. The second exception is that, unless otherwise provided under federal law, access charges for interconnected VOIP service are subject to the access service charge requirements described above.

UNIVERSAL SERVICE

Current law requires the PSC to promulgate rules that define a basic set of essential telecommunications services that must be available to all customers at affordable prices and that are a necessary component of universal service. Current law also requires the PSC to promulgate rules that define a set of advanced service capabilities that must be available to all areas of this state at affordable prices within a reasonable time and that are a necessary component of universal service. The essential services and advanced service capabilities must be based on market, social, economic development, and infrastructure development principles rather than on specific technologies or providers.

This bill repeals the foregoing requirements and requires instead that certain telecommunications providers must make available to their customers all essential telecommunications services. The bill defines “essential telecommunications services” as services or functionalities determined by the FCC to be eligible for support by federal universal service support mechanisms. The bill’s requirement applies to a telecommunications provider that provides basic local exchange service or that is designated under federal law as a telecommunications carrier eligible to receive support from the federal universal service fund. Also, the bill provides that a telecommunications provider may provide essential telecommunications services itself or through an affiliate or through the use of any available technology or mode.

ELECTRONIC CALL DETAIL RECORDS

The bill requires a telecommunications provider that provides tandem switching service (tandem switching provider) to make certain electronic call detail records available to other telecommunications providers. The requirement applies to calls originated by wireless providers (which are referred to as commercial mobile radio service providers) and CLECs, and subsequently routed by the tandem switching provider to another telecommunications provider’s network for termination. A tandem switching provider must make the electronic call detail records available no later than 24 months after the bill’s effective date. The bill provides that a tandem switching provider complies with the foregoing requirements

ASSEMBLY BILL 696

if an electronic call detail record that is made available contains the information provided by the telecommunications provider that originated the call. The bill also provides that it does not otherwise change the record creation, record exchange, or billing processes for traffic carried by interexchange carriers that are in effect on the bill's effective date.

19 **196.191 Telecommunications access charges. (1) DEFINITIONS.** In this
20 section:

21 (a) “Access charges” means dedicated access charges and switched access
22 charges.

23 (b) “Access service” means the provision of switched or dedicated access to a
24 local exchange network for the purpose of enabling a telecommunications provider
25 to originate or terminate telecommunications service within the local exchange.

ASSEMBLY BILL 696**SECTION 12**

1 (c) “Dedicated access” means the provision of wholesale intrastate access
2 service, other than switched access service, to a local exchange network for the
3 purpose of enabling a telecommunications provider to originate or terminate
4 telecommunications service within the local exchange.

5 (d) “Dedicated access charges” means the rates and rate elements that a local
6 exchange carrier charges a telecommunications provider for the provision of
7 dedicated access.

8 (e) “Incumbent local exchange carrier” has the meaning given in 47 USC 251
9 (h) (1).

10 (f) “Lost revenues” means the amount of the reduction of an incumbent local
11 exchange carrier’s revenues that results directly from the incumbent local exchange
12 carrier’s compliance with sub. (2) as calculated under sub. (3) (c).

13 (g) “Switched access” means the provision of switched access to a local exchange
14 network for the purpose of enabling a telecommunications provider to originate or
15 terminate telecommunications service within the local exchange.

16 (h) “Switched access charges” means the rates and rate elements that a local
17 exchange carrier charges a telecommunications provider for the provision of
18 switched access, including any carrier common line charges or substitute charges.

19 **(2) INCUMBENT LOCAL EXCHANGE CARRIERS.** No incumbent local exchange carrier
20 may increase its intrastate access charges so that the charges exceed the incumbent
21 local exchange carrier’s interstate access charges allowed under federal law. No later
22 than 6 months after the effective date of this subsection [LRB inserts date], an
23 incumbent local exchange carrier shall make any reductions in its intrastate access
24 charges that are necessary to ensure that the charges do not exceed the incumbent
25 local exchange carrier’s interstate access charges allowed under federal law.

ASSEMBLY BILL 696

- 1 **(3) RECOVERY OF LOST REVENUES.** (a) *Amounts recoverable from universal service*
2 *fund.* 1. An incumbent local exchange carrier shall recover lost revenues from the
3 universal service fund in the following amounts:
- 4 a. During the first year following a reduction under sub. (2), the incumbent
5 local exchange carrier shall recover 95 percent of its lost revenues in each month.
- 6 b. During the 2nd year following a reduction under sub. (2), the incumbent local
7 exchange carrier shall recover 85 percent of its lost revenues in each month.
- 8 c. Except as provided in subd. 2., during the 3rd year following a reduction
9 under sub. (2), and during each year thereafter, the incumbent local exchange carrier
10 shall recover 75 percent of its lost revenues in each month.
- 11 2. a. In this subdivision, “broadband service” means a service that provides
12 access to the Internet that is capable of transmitting data packets or Internet signals
13 at upstream or downstream average minimum speeds of 200 kilobits per second,
14 except that the commission may promulgate rules specifying greater upstream or
15 downstream average minimum speeds if such speeds are consistent with any
16 definition of broadband service established by the federal communications
17 commission.
- 18 b. If an incumbent local exchange carrier fails to provide access to broadband
19 service to at least 85 percent of its customers in any month during the 6th year
20 following a reduction under sub. (2), or during any year thereafter, the incumbent
21 local exchange carrier shall recover from the universal service fund 50 percent of its
22 lost revenues in that month.
- 23 (b) *Amounts not recoverable from universal service fund.* Beginning 6 months
24 after the effective date of this paragraph [LRB inserts date], an incumbent local
25 exchange carrier may, by increasing its monthly rates for any service other than

ASSEMBLY BILL 696**SECTION 12**

1 access service, recover lost revenues not recovered from the universal service fund
2 under par. (a).

3 (c) *Calculation; notification.* No later than 60 days after the effective date of
4 this paragraph [LRB inserts date], each incumbent local exchange carrier shall
5 notify the commission in writing, with supporting documentation, of the amount of
6 the reduction in annual intrastate access revenues that results from the reduction
7 required under sub. (2). The reduction in switched access revenues shall be
8 calculated for each incumbent local exchange carrier as the difference between
9 intrastate and interstate switched access charges in effect on October 1, 2009,
10 multiplied by the intrastate switched access minutes of use and other switched
11 access demand quantities for the 2008 calendar year. The reduction in dedicated
12 access revenues shall be calculated for each incumbent local exchange carrier as the
13 difference between the dedicated access charges in effect on October 1, 2009, and the
14 dedicated access charges after any reduction required under sub. (2), multiplied by
15 demand quantities for the 2008 calendar year.

16 (d) *Commission duties; disbursements.* 1. No later than 60 days after an
17 incumbent local exchange carrier makes the notification required under par. (c), the
18 commission shall calculate the size of the monthly disbursement from the universal
19 service fund for each incumbent local exchange carrier.

20 2. If an incumbent local exchange carrier is in compliance with this section, the
21 commission shall begin monthly disbursements from the universal service fund to
22 the incumbent local exchange carrier within 270 days after the effective date of this
23 subdivision [LRB inserts date]. In any month, the commission may not make a
24 disbursement to an incumbent local exchange carrier that exceeds an amount
25 reasonably approximating the carrier's lost revenues for that month.

ASSEMBLY BILL 696

1 3. The commission shall establish procedures for administering disbursements
2 from the universal service fund required under this paragraph.

3 **(4) OTHER TELECOMMUNICATIONS PROVIDERS.** (a) In this subsection,
4 “telecommunications provider” does not include an incumbent local exchange
5 carrier.

6 (b) A telecommunications provider’s intrastate access charges for a local
7 exchange may not exceed the intrastate access charges of the incumbent local
8 exchange carrier that provides telecommunications service in the local exchange,
9 except that if a telecommunications provider is required to make reductions under
10 par. (c), this paragraph first applies to such a telecommunications provider on the
11 first day of the 60th month beginning after the effective date of this paragraph
12 [LRB inserts date].

13 (c) On the effective date of this paragraph [LRB inserts date], if a
14 telecommunications provider’s intrastate access charges for a local exchange exceed
15 the intrastate access charges in effect on October 1, 2009, of the incumbent local
16 exchange carrier that provides telecommunications service in the local exchange, the
17 telecommunications provider shall determine the difference between the charges

11 196.194 (1) TELECOMMUNICATIONS UTILITIES. ~~Except as provided in this~~
12 ~~subsection, nothing~~ Nothing in this chapter prohibits the commission from
13 approving the filing of a tariff which permits a telecommunications utility to enter
14 into an individual contract with an individual customer if substitute
15 telecommunications services are available to customers or potential customers of the
16 telecommunications utility and the absence of such a tariff will cause the
17 telecommunications utility to be disadvantaged in competing for business. ~~A tariff~~
18 ~~filed under this subsection shall include the condition that any such contract shall~~
19 ~~be compensatory as determined under s. 196.204 (5) and (6).~~ The tariff shall include
20 any other condition and procedure required by the commission in the public interest.
21 ~~Within 20 days after a contract authorized under this subsection or an amendment~~
22 ~~to such a contract has been executed, the telecommunications utility shall submit to~~
23 ~~the commission written notice of the general nature of the contract and the parties~~

5 may make appropriate adjustments in the rates or tariffs of the telecommunications

7 chapter. The dollar amount of the adjustment may not be less than the amount by
8 which the contract was found to be noncompensatory.

14 196.195 (5) COMMISSION ACTION. If after the proceedings under subs. (2), (3) and
15 (4) the commission has determined that effective competition exists in the market
16 for the telecommunications service which justifies a lesser degree of regulation and
17 that lesser regulation in that market will serve the public interest, the commission
18 may, by order, suspend tariffing requirements under s. 196.194 (1) or any of the
19 following provisions of law ch. 201, except as provided under subs. (7) and (8): ~~ch.~~
