To Denise Solie:

I did not reinsert the medical assistance reporting requirement exactly as worded in current law. The current law version, after the current hospital assessment appropriation reference is removed, only refers to one of many components making up the state share of medical assistance. Adding a reference to the new hospital assessment appropriation would not complete the state share either. I have worded the amended section to include all components of the state share without referring to them by section number. If you would like me to refer to specific appropriation sections, please let me know what sections you would like included.
