Description Federalizing the treatment of capital losses					

Assumptions Used in Arriving at Fiscal Estimate

Under current Wisconsin and federal law capital losses can be fully offset against capital gains in determining taxable income. Capital losses cannot, however, be fully offset against other income. In Wisconsin an annual maximum of \$500 of capital losses can be deducted from ordinary income, while at the federal level an annual maximum of \$3,000 of capital losses can be deducted from ordinary income.

This bill increases the \$500 annual limit on capital loss deductions to the \$3,000 federal level.

No estimate is available for the amount of capital losses that will be reported for 2009 or the share of those losses that will exceed \$500. Reviewing returns from 2000 to 2007, capital losses have been reported on as many as 10% of returns (in 2002 and 2003) to fewer than 5% of returns (in 2000 and 2007). Using the 2005 Individual Income Tax Model and assuming conditions similar to tax year 2002, the trough of the previous business cycle and the previous peak year for reporting of capital losses, it is estimated that this bill would reduce revenue by \$27 million annually. To the extent that more taxpayers report capital loss deductions in tax year 2009, the fiscal effect of the bill will be larger.

Long-Range Fiscal Implications

Capital gains and loss realizations are subject to greater variability than other sources of income. As a result, the fiscal effect of the bill will vary substantially from year to year.
