Dear Members of the Senate & Assembly Energy & Utilities Committees,

I strongly oppose the wind siting reform bill (SB185 & AB256) that may soon be coming to vote which would give the Public Service Commission control of the siting of all industrial wind turbines and would take away local control. No local input is very poor policy.

This wind energy push is irresponsible on multiple levels. There are a plethora of health and safety factors that need to be mitigated by having proper setbacks (half mile setbacks from residences as suggested by the federal study done by the National Research Council in 2007).

Please be aware that the State Wind Model Ordinance is not based on fact and scientific documentation, but rather, was written by a group of stakeholders.

Other obvious negatives are the violation of property rights, the lowering of property values, lack of energy efficiency, and environmental factors such as ground water contamination and irritation to wildlife.

Please oppose this bill (SB185 & AB256) and keep control of wind tower siting in the hands of local government. **I believe that a renewable energy plan worth supporting must first preserve and protect our four most important non-renewables: our families, our homes, our communities, and our land.**

Respectfully,

HERBERT BUEHL

Madison, Wisconsin

Dear Members of the Senate & Assembly Energy & Utilities Committees,

I strongly oppose the wind siting reform bill (SB185 & AB256) that may soon be coming to vote which would give the Public Service Commission control of the siting of all industrial wind turbines and would take away local control. No local input is very poor policy.

This wind energy push is irresponsible on multiple levels. There are a plethora of health and safety factors that need to be mitigated by having proper setbacks ($\frac{1}{2}$ mile from residences as suggested by the federal study done by the National Research Council in 2007).

Please be aware that the State Wind Model Ordinance is not based on fact and scientific documentation, but rather, was written by a group of stakeholders.

Other obvious negatives are the violation of property rights, the lowering of property values, lack of energy efficiency, and environmental factors such as ground water contamination and irritation to wildlife.

Please oppose this bill (SB185 & AB256) and keep control of wind tower siting in the hands of local government. **I believe that a renewable energy plan worth supporting must first preserve and protect our four most important non-renewables: our families, our homes, our communities, and our land.**

Respectfully,

Michael Leitner

Please be aware that the State Wind Model Ordinance is not based on fact and scientific documentation, but rather, was written by a group of stakeholders.

Other obvious negatives are the violation of property rights, the lowering of property values, lack of energy efficiency, and environmental factors such as ground water contamination and irritation to wildlife.

Please oppose this bill (SB185 & AB256) and keep control of wind tower siting in the hands of local government. **I believe that a renewable energy plan worth supporting must first preserve and protect our four most important non-renewables: our families, our homes, our communities, and our land.**

Respectfully,

Dear Members of the Senate & Assembly Energy & Utilities Committees,

I strongly oppose the wind siting reform bill (SB185 & AB256) that may soon be coming to vote which would give the Public Service Commission control of the siting of all industrial wind turbines and would take away local control. No local input is very poor policy.

This wind energy push is irresponsible on multiple levels. There are a plethora of health and safety factors that need to be mitigated by having proper setbacks (1/2 mile from residences as suggested by the federal study done by the National Research Council in 2007).

Please be aware that the State Wind Model Ordinance is not based on fact and scientific documentation, but rather, was written by a group of stakeholders.

Other obvious negatives are the violation of property rights, the lowering of property values, lack of energy efficiency, and environmental factors such as ground water contamination and irritation to wildlife.

Please oppose this bill (SB185 & AB256) and keep control of wind tower siting in the hands of local government. **I believe that a renewable energy plan worth supporting must first preserve and protect our four most important non-renewables: our families, our homes, our communities, and our land.**
