Miscellaneous ... Misc

Wisconsin State Capitol Madison, Wisconsin

Dear Members of the Senate & Assembly Energy & Utilities Committees,

I strongly oppose the wind siting reform bill (SB185 & AB256) that may soon be coming to vote which would give the Public Service Commission control of the siting of all industrial wind turbines and would take away local control. No local input is very poor policy.

This wind energy push is irresponsible on multiple levels. There are a plethora of health and safety factors that need to be mitigated by having proper setbacks (Imile from residences as suggested by the federal study done by the National Research Council in 2007).

Please be aware that the State Wind Model Ordinance is not based on fact and scientific documentation, but rather, was written by a group of stakeholders.

Other obvious negatives are the violation of property rights, the lowering of property values, lack of energy efficiency, and environmental factors such as ground water contamination and irritation to wildlife.

Please oppose this bill (SB185 & AB256) and keep control of wind tower siting in the hands of local government. I believe that a renewable energy plan worth supporting must first preserve and protect our four most important non-renewables: our families, our homes, our communities, and our land.

Respectfully,

Sandra a. Popp W3853 lower Rd. Chilfon, WI 530/4 930-849-1149

Wisconsin State Capitol Madison, Wisconsin

This wind energy push is irresponsible on multiple levels. There are a plethora of health and safety factors that need to be mitigated by having proper setbacks (Innile from residences as suggested by the federal study done by the National Research Council in 2007).

Please be aware that the State Wind Model Ordinance is not based on fact and scientific documentation, but rather, was written by a group of stakeholders.

Other obvious negatives are the violation of property rights, the lowering of property values, lack of energy efficiency, and environmental factors such as ground water contamination and irritation to wildlife.

Please oppose this bill (SB185 & AB256) and keep control of wind tower siting in the hands of local government. I believe that a renewable energy plan worth supporting must first preserve and protect our four most important non-renewables: our families, our homes, our communities, and our land.

Respectfully,

Lawtephner
Kain Hepmer
W1860 Querry Rd.
New Holstein, WI 5301

Dear Members of the Senate & Assembly Energy & Utilities Committees,

I strongly oppose the wind siting reform bill (SB185 & AB256) that may soon be coming to vote which would give the Public Service Commission control of the siting of all industrial wind turbines and would take away local control. No local input is very poor policy.

This wind energy push is irresponsible on multiple levels. There are a plethora of health and safety factors that need to be mitigated by having proper setbacks (19 mile from residences as suggested by the federal study done by the National Research Council in 2007).

Please be aware that the State Wind Model Ordinance is not based on fact and scientific documentation, but rather, was written by a group of stakeholders.

Other obvious negatives are the violation of property rights, the lowering of property values, lack of energy efficiency, and environmental factors such as ground water contamination and irritation to wildlife.

Please oppose this bill (SB185 & AB256) and keep control of wind tower siting in the hands of local government. I believe that a renewable energy plan worth supporting must first preserve and protect our four most important non-renewables: our families, our homes, our communities, and our land.

Respectfully, Wan Hourn

Wisconsin State Capital Madison, Wisconsin

Dear Members of the Senate and Assembly Energy and Utilities Committee

I strongly oppose the wind siting reform bill (SB185 & AB256). To take away local control of the wind turbine siting is a slap in the face to the people of this state who have used their constitutional right to enact local ordinances to protect the people in their local Townships and Counties. To have the State Model ordinance be a one size fits all type ordinance would be flat out wrong. There are a lot of different issues that need to be taken into consideration in different parts of the state and therefore need to be enacted by local governments. IT IS OUR RIGHT as taxpaying citizens to make our own ordinances. What may be right for Milwaukee County is not right for all Counties. The fact that politicians have already made the regulations that Industrial Wind turbines are compatible with farmland and that energy companies need to have 20% renewable energy without any research and input from average homeowners in these areas is WRONG. Industrial machines belong in Industrial Parks. The 20% renewable needs to be done in a way that helps individual taxpaying citizen's not just big wind and energy companies. Subsidizing Industrial Wind Farms that do nothing for our energy needs, and only are being built for a few long term jobs are a total waste of taxpayer dollars. We already have a huge deficit in this state. Stop blowing our money on useless Wind Farms.

Respectfully

Mary Thompson W2575 Blackberry Dr Mt. Calvary, WI 53057 920) 922-0213
