Dear Members of the Senate and Assembly Energy and Utilities Committee

I strongly oppose the wind siting reform bill (SB185 & AB256). To take away local control of the wind turbine siting is a slap in the face to the people of this state who have used their **constitutional right** to enact local ordinances to protect the people in their local Townships and Counties. To have the State Model ordinance be a one size fits all type ordinance would be flat out wrong. There are a lot of different issues that need to be taken into consideration in different parts of the state and therefore need to be enacted by local governments. IT IS OUR RIGHT as taxpaying citizens to make our own ordinances. What may be right for Milwaukee County is not right for all Counties. The fact that politicians have already made the regulations that Industrial Wind turbines are compatible with farmland and that energy companies need to have 20% renewable energy without any research and input from average homeowners in these areas is WRONG. Industrial machines belong in Industrial Parks. The 20% renewable needs to be done in a way that helps individual taxpaying citizen's not just big wind and energy companies. Subsidizing Industrial Wind Farms that do nothing for our energy needs, and only are being built for a few long term jobs are a total waste of taxpayer dollars. We already have a huge deficit in this state. Stop blowing our money on useless Wind Farms.

Respectfully

Mae Fowler
