

Fiscal Estimate Narratives

DA 10/10/2011

LRB Number	11-0430/1	Introduction Number	SB-214	Estimate Type	Original
Description Requiring a person arrested for or charged with certain offenses, or a juvenile taken into custody for certain offenses, to provide a biological specimen for deoxyribonucleic acid analysis; inclusion of the analysis results in the deoxyribonucleic acid data bank; requiring the exercise of rule-making authority; and providing a penalty					

Assumptions Used in Arriving at Fiscal Estimate

Under current law, certain persons (e.g. - juvenile who has been adjudicated delinquent for certain offenses, a person guilty of a felony, a person found guilty of 4th degree sexual assault, a person who has been found to be a sexually violent person, etc.) are required to submit biological specimens to the crime laboratories for DNA analysis.

This bill requires law enforcement agencies to collect a biological specimen for DNA analysis from every adult arrested for the reasons cited above, and for the law enforcement agency to submit the specimen to the crime lab for DNA analysis and inclusion in the person's DNA profile in the data bank. Expungement is required under certain circumstances.

Because the focus of the bill is to require law enforcement agencies to collect biological specimens for DNA analysis, prosecutors do not expect any fiscal impact on their offices.

It is possible that local law enforcement agencies may face increased costs as a result of this bill.

Long-Range Fiscal Implications

For the reasons stated above, prosecutors do not anticipate any long-term fiscal impact on their offices.
